iShares STOXX Europe 600 UCITS ETF (DE) EUR Dist / DE0002635307 / 263530 / BlackRock AM (DE)

Investment strategy

The Fund mostly invests in equities in order to achieve the investment objective. The proportion of assets in the Fund which matches the weighting of the Index (duplication percentage) is at least 95% of the Fund's assets. It is not the Investment Manager's intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes.

Investment goal

The iShares STOXX Europe 600 UCITS ETF (DE) (the "Fund") is a passively managed exchange traded fund (ETF) that aims to track the performance of the STOXX® Europe 600 (Price Index) as closely as possible. In this regard, it aims to replicate the benchmark (Index). The Index measures the performance of the 600 by free float market capitalisation largest stocks across 17 developed European countries. The Index rebalances quarterly with components weighted by free float market capitalisation and capped at 20% to maintain diversification. Free float market capitalisation is the market value of a company's readily available outstanding shares.
