## Ninety One Funds Series iii - Global Sustainable Equity Fund Class A Accumulation shares in sterling /

### Investment strategy

The Fund takes a positive inclusion approach which means that the Investment Manager focuses on investing in companies it believes to be leaders in their industry sectors and geographies in their approach to sustainability. These companies have policies, operations and/or business models that aim to minimise their harmful effects on society and the environment, or whose products and/or services seek to benefit society and the environment. The Investment Manager believes that the effects a company has on its wider stakeholders (e.g. society, the environment, its employees) will be increasingly recognised by the financial markets.

### Investment goal

The Fund aims to provide capital growth (to grow the value of the investment) and income over at least 5 years. The Fund invests primarily (at least two-thirds but typically substantially more) in the shares of companies around the world which meet the Investment Manager's sustainability framework.
