SEB Fund 1 - SEB Asset Selection Fund - Klasse C (EUR) / LU0256624742 / A0J4TG / SEB IM

Investment strategy

The fund is actively managed, invests globally, and aims to predict the price development for different types of asset classes, such as stocks, fixed-income securities and currencies. Investment decisions are based on systematic review of substantial amounts of data (quantitative analysis). The fund aims to manage total risk and determine long and short positions, which means it has the possibility to generate returns regardless of whether the market is positive or negative. The return is determined by how much the fund's holdings increase or decrease in value during your holding period.

Investment goal

The fund aims to increase the value of your investment over time by delivering an average annual return of the risk-free rate plus 5%, taking into account the risk level of the fund. The fund's average annual volatility (price fluctuation) aims to be 10%.
