Investment strategy

Securities targeted by the Sub-Fund can be similar to those of the index to an extent that varies overtime but their weighting is expected to materially differ. The performance of the Sub-Fund may deviate materially from that of the index. The Sub-Fund aims to generate capital growth over the long term. It mainly invests in bonds that may be converted into equities of Asian companies, denominated in various currencies, as well as synthetic convertible bonds (segregated purchase of bonds and options). The Sub-Fund focuses on the asymmetrical profile of the asset class, i.e. profiting from equity market upturns while benefiting from the downside protection of a fixed-income structure.

Investment goal

The Sub-Fund is actively managed. The FTSE Russell Convertible Asia Ex-Japan TR index is used for performance comparison as well as internal risk monitoring purposes, without implying any particular constraints to the Sub-Fund's investments.
