Investment strategy

The Sub-Fund is actively managed. The majority of issuers in the Sub-Fund are likely to be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but has some discretion to deviate from its composition and risk characteristics within indicative risk parameters. The Sub-Fund will resemble the composition and risk characteristics of its benchmark, however, the Investment Manager's discretion may result in performance that differs from the benchmark. At least 67% of assets invested in debt securities issued or guaranteed by governments globally, including agencies and local governments guaranteed by such governments. The Sub-Fund may invest up to 20% in debt securities issued or guaranteed by supranational organisations. The Sub-Fund will not invest in convertible bonds, equities or other participation rights. At least 51% of assets are invested in issuers with positive environmental and/or social characteristics that follow good governance practices as measured through the Investment Manager's proprietary ESG scoring methodology and/or third party data.

Investment goal

To achieve a return in line with the benchmark by investing primarily in global government debt securities.
