Amundi ShortDAX Daily (-2x) Inverse UCITS ETF Acc / FR0010869495 / LYX0FV / Amundi AM (FR)

Investment strategy

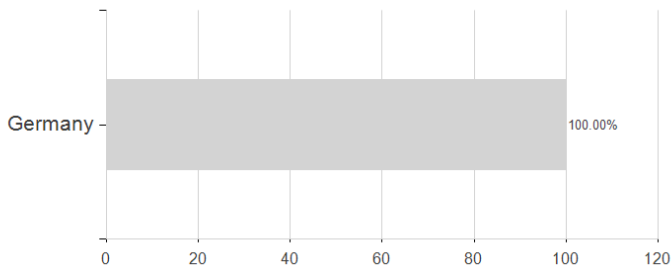

The Fund aims to achieve its objective by means of indirect replication, namely by entering into one or more OTC swaps (financial futures instruments, "FFIs"). The Fund may invest in a diversified portfolio of international shares whose performance will be exchanged against that of the Benchmark Index through FFIs.

Investment goal

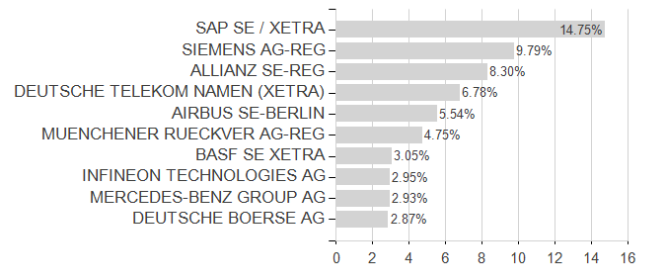

The Fund is a passively managed, index-based fund. The objective of the Fund's management is to be inversely exposed with a daily rebalancing to the German stock market by replicating, both upwards and downwards, the development of the ShortDAX x2 strategy index (gross dividends reinvested) (the "Benchmark Index"), denominated in euro (EUR) and which is a short selling strategy (with a daily -2x leverage effect), with daily rebalancing, on the DAX index (gross dividends reinvested) (the "Parent Index"), the main German stock exchange index, while keeping the tracking error (the "Tracking Error") between the performances of the Fund and those of the Benchmark Index to a minimum.
