2 The Mountain-View Data Fund Rating calculates a comparative ranking for funds using yield, volatility and trend data. For more information visit [MVD Funds Rating](#)

Investment strategy

The Fund seeks to achieve this objective through selective investment in a global portfolio of catastrophe bonds ("CAT Bonds"). CAT Bonds are debt securities that transfer the risk of catastrophic events from insurance companies, reinsurance companies, corporations, governments, etc. to the capital markets. CAT Bonds may or may not be rated by an independent rating agency and there are no credit quality or maturity restrictions on the CAT Bonds to which the Fund may gain exposure. Such CAT Bonds may have fixed, variable or floating rates of interest and have a maturity of 1-4 years.

Investment goal

The investment objective of the Fund is to generate returns.
