AXA WF ACT Emerging Markets Short Duration Bonds Low Carbon I Capitalisation USD / LU0800573346 / A1J0LN /

Investment strategy

The Sub-Fund is actively managed in order to capture opportunities in emerging short duration bonds market, primarily investing in securities that are part of the Benchmark universe. The investment manager has broad discretion over the composition of the portfolio and can take exposure to companies, countries or sectors not included in the Benchmark, even though the Benchmark constituents are generally representative of the Sub-Fund's portfolio. The deviation from the Benchmark is likely to be significant.

Investment goal

To seek performance, in USD, by investing mainly in short duration debt securities issued in the emerging debt universe over a medium term period, whose carbon footprint is at least 30% lower than that of the index composed of 75% J. P. Morgan Corporate Emerging Market Bond Index Broad Diversified + 25% J. P. Morgan Emerging Market Bond Index Global Diversified (Benchmark). As a secondary 'extra-financial objective', the water intensity of the portfolio aims at being at least 30% lower than the Benchmark.
