UBS (Irl) Fund Solutions plc - Bloomberg Commodity Index SF UCITS ETF, Klasse (hedged to EUR) A-acc /

Investment strategy

The Fund invests in financial derivative instruments ('FDIs') with UBS AG, London Branch ('UBS') as counterparty. The Fund may also invest in securities (e.g. company shares and bonds issued by companies and governments). Under the terms of the FDIs, the performance of the Index is swapped from UBS to the Fund, and in return the performance of the securities is swapped from the Fund to UBS - consequently, the Fund's performance reflects the performance of the Index and is not impacted by the performance of the securities.

Investment goal

The objective of the Fund is capital appreciation. The Fund tracks the daily performance of a commodity index, called the Bloomberg Commodity Index Total Return (the 'Index'), less fees and costs and consequently is passively managed.
