Investment strategy

The Fund invests at least 2/3 of its assets in a broadly diversified set of commodities or commodity classes using complex financial instruments. These complex financial instruments offer the same returns as the underlying commodities. As a result, there is no direct investment in physical commodities. The Fund may invest its assets in various currencies, the fluctuation in which is hedged against the base currency.

Investment goal

The aim of the sub-fund ("Fund") is to participate indirectly in the growth potential of the international commodity markets. The Fund strives to achieve higher capital growth over the long term than that of the benchmark index.
