Fidelity Funds - Fidelity Target TM 2045 Fund A-ACC-Euro / LU1025014389 / A1XCVT / FIL IM (LU)

Investment strategy

The fund is actively managed and references a blend of market indices (each a "Market Index") in order to set internal guidelines around the weightings allocated to different asset classes. The fund is managed to offer an optimized asset allocation between asset classes with different risk and return characteristics. The asset allocation has been designed to de-risk portfolio by migrating from a growth to a defensive asset allocation up to the fund's target date. The Investment Manager takes into account Sustainability Risks in its investment process. For more information, see "Sustainable Investing and ESG Integration".

Investment goal

The fund aims to achieve capital growth over the long term for investors planning to withdraw substantial portions of their investment in the year 2045. The fund invests in a range of asset classes such as bonds, equities, interest bearing and money market instruments as well as eligible exposure to commodities from anywhere in the world, including emerging markets. These investments may be denominated in any currency and some of them may be below investment grade or unrated. The proportion of assets allocated to each asset class varies over time and the fund will increasingly favour lower risk investments as it approaches its target date, shifting to an increasingly conservative asset allocation. The fund may invest in the following assets according to the percentages indicated: collateralised and securitised debt instruments: up to 20% SPACs: less than 5%. The fund will not terminate at the target date but will continue to be managed in accordance with its investment objective and policy.
