Investment strategy

The Fund invests at least 70% of its assets in high yielding debt securities (issued or guaranteed by governments and corporates) listed or traded on Regulated Markets listed in the Prospectus. Higher yields are generally available from securities rated BB+ or lower by S&P, or the equivalent by another NRSRO, or unrated securities of equivalent quality. The Fund may invest in debt securities rated as low as D by S&P or the equivalent by another NRSRO, which ratings indicate that the obligations are highly speculative and may be in default or in danger of default as to principal and interest. The Fund may purchase unsecuritised participations in or assignments of floating rate mortgages or other commercial loans that are liquid. The Fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the Fund's objective as well as to reduce risk or cost or to generate additional growth or income for the Fund.

Investment goal

The Fund's primary investment objective is to generate total return. The generation of high current income is a secondary objective.
