JPMorgan Funds - Global Short Duration Bond Fund X (acc) - USD / LU0430495779 / A0X8S6 / JPMorgan AM (EU)

Investment strategy

At least 67% of assets invested, either directly or through derivatives, in investment grade short-term debt securities (including MBS/ABS) of issuers anywhere in the world, including emerging markets. The Sub-Fund is expected to invest between 5% and 20% of its assets in mortgage-backed securities (MBS) and/or asset-backed securities (ABS). MBS which may be agency (issued by quasi US government agencies) and non-agency (issued by private institutions) refers to debt securities that are backed by mortgages, including residential and commercial mortgages, and ABS refers to those that are backed by other types of assets such as credit card debt, car loans, consumer loans and equipment leases. The Sub-Fund is actively managed. The majority of issuers in the Sub-Fund are likely to be represented in the benchmark because the Investment Manager uses it as a basis for portfolio construction, but has some discretion to deviate from its composition and risk characteristics within indicative risk parameters.

Investment goal

To achieve a return in excess of global short duration bond markets by investing primarily in global investment grade short-term debt securities, using derivatives where appropriate.
