**CSIF (Lux) Equity Japan FB JPY / LU1419779118 / A2ALZ1 / Credit Suisse Fd. M.**

**Investment strategy**

The portfolio and the performance of the Sub-fund can deviate from the index. Under normal market conditions, it is expected that the anticipated level of tracking error will be less than 0.20%. The Sub-fund uses a physical replication strategy and invests mainly in a representative selection of equities and equity - type securities and rights, including shares, dividend-right certificates, shares in cooperatives, participation certificates, issued by companies which are part of the index. At the same time, the Sub-fund can use derivatives to achieve the above aims. As compared to the full replication method, the representative sampling method may lead to lower transaction costs in the context of portfolio rebalancing, as well as to higher variability of the difference between the return of the index and the return an investor in the Sub-fund receives.

**Investment goal**

This Index Tracker Sub-fund is passively managed aiming to replicate the performance of the MSCI Japan (NR) Index. The Index is a free-float adjusted market capitalization weighted index that is designed to track the equity market performance of Japanese securities listed on Tokyo Stock Exchange, Osaka Stock Exchange, JASDAQ and Nagoya Stock Exchange and is rebalanced on a quarterly basis and may also be rebalanced at other times.
