Investment strategy

The Fund invests at least 2/3 of its assets in shares worldwide. It focuses on shares which it believes offer a high degree of potential for achieving capital gains. Within this 1/3 portion, the Fund may invest up to 10% of the assets in exchange-traded commodities (ETCs) (so-called Delta 1 certificates), commodities funds and investments in precious metal accounts, provided the assets are settled in cash and no physical delivery may ensue. The Fund may invest in floating and fixed-rate debt securities issued by governments and companies. The Fund is also free to invest in debt securities that can be converted into shares.

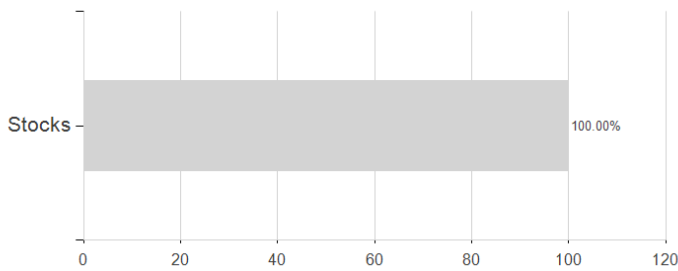

Investment goal

The aim of the sub-fund ("Fund") is to achieve above-average long-term capital growth. For this purpose, the Fund invests worldwide in shares which, in its estimation, are very undervalued and offer a high degree of potential for achieving capital gains.
