Investment strategy

The securities are selected on a discretionary basis using a consistent investment process (active management). With regard to portfolio composition, the selection of stocks and the associated weightings are focused on companies from the tailored benchmark index. The portfolio composition may deviate considerably from this benchmark index. The composition is set out in the sales prospectus. The investment policy is to outperform the benchmark index. The Asset Manager may at any time deviate - significantly or insignificantly, positively or negatively - from the benchmark index by actively overweighting or underweighting individual securities and sectors based on market conditions and risk assessments.

The investment objective is to preserve the capital on a long-term basis and to generate an adequate return in EUR by investing in bonds and shares worldwide that are compatible with the Sustainable approach. The fund invests in shares, bonds and money market instruments. The equities portion is between 35% and 65%. The fund is classified under Art. 9 SFDR.
