Investment strategy

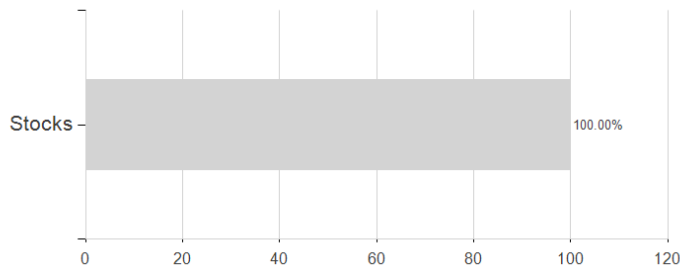

MSCI's website (www.msci.com) contains more detailed information about the MSCI indexes. The Benchmark Index is a net total return index. A net total return index calculates the performance of the index constituents on the basis that any dividends or distributions are included in the index returns after withholding tax retention. The Fund seeks to achieve its objective via indirect replication by entering into an over-the-counter swap contract (financial derivative instrument, the "FDI"). The Fund may also invest in a diversified portfolio of international equities, whose performance will be exchanged against the performance of the benchmark Index via the FDI.

Investment goal

The Fund is an index-tracking UCITS passively managed. The investment objective is to track both the upward and the downward evolution of the MSCI Turkey Net Total Return Index (Net dividends reinvested) (the Benchmark Index") denominated in US dollars (USD) and representative of the Turkish stock market and to minimize the tracking error between the Fund's performance and the performance of the Benchmark Index.
