Investment strategy

In actively managing the sub-fund, the investment manager uses a combination of market and fundamental analysis to identify companies that appear to have above-average dividend prospects (top-down and bottom-up approach). The sub-fund is mainly exposed to the issuers of the benchmark, however, the management of the sub-fund is discretionary, and will invest in issuers not included in the benchmark. The sub-fund monitors risk exposure in relation to the benchmark however the extent of deviation from the benchmark is expected to be material.

Investment goal

Seeks to increase the value of your investment (mainly through income), and outperform the benchmark, over the recommended holding period, while achieving an ESG score greater than that of the benchmark.
