Investment strategy

The fund invests at least 70% of its assets, in equities of companies that are involved in the design, manufacture, or sale of products and services used in connection with the water and waste management. The water management sector includes but is not limited to, those companies involved in water production, water conditioning, de-salination, supply, bottling, transport and dispatching of water. The waste management sector includes but is not limited to, those companies involved in the collection, recovery and disposal of waste, including recycling, incineration, anaerobic digestion of food waste (biological processes) and landfilling of residual waste. In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. It also considers ESG characteristics when assessing investment risks and opportunities.

Investment goal

The fund aims to achieve capital growth over the long term.
