**Investment strategy**

At least 67% of assets invested, either directly or through derivatives, in equities of companies that are domiciled, or carrying out the main part of their economic activity, in a European Country. The Sub-Fund will typically hold long positions of approximately 130%, and short positions of approximately 30% (achieved through derivatives) of net assets but may vary from these targets depending on market conditions. At least 51% of assets (excluding short positions) are invested in companies with positive environmental and/or social characteristics that follow good governance practices as measured through the Investment Manager's proprietary ESG scoring methodology and/or third party data. The Sub-Fund is actively managed. Though the majority of its holdings (excluding derivatives) are likely to be components of the benchmark, the Investment Manager has broad discretion to deviate from its securities, weightings and risk characteristics.

**Investment goal**

To provide long term capital growth through exposure to European companies, by direct investments in securities of such companies and through the use of derivatives.
