**UBS ETF JPM.USD EM D.B.1-5 UE A GBP H / LU1645386647 / A2DUHY / UBS AM S.A. (EU)**

**Investment strategy**

The proportionate exposure by the Fund to the component securities will be substantially achieved either through direct investment or through the use of derivatives or through a combination of both techniques. The Fund may further hold securities which are not comprised in its Index if the portfolio manager believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors. The Fund will invest its net assets predominantly in bonds, transferable securities, money market instruments, units of undertakings for collective investment, deposits with credit institutions, structured notes listed or dealt in on a regulated market and other assets eligible under the prospectus.

**Investment goal**

UBS (Lux) Fund Solutions - J.P. Morgan USD EM Diversified Bond 1-5 UCITS ETF (the 'Fund') is passively managed and will take proportionate exposure on the components of the J.P. Morgan USD EM Diversified 3% capped 1-5 Year Bond Index (Total Return) using a stratified approach (stratified sampling strategy) by investing in a representative sample of components of the underlying index selected by the portfolio manager using a 'portfolio optimisation' technique.
