LO Fds.-Transition Materials NA USD / LU0640921382 / A1JB35 / Lombard Odier F.(EU)

Investment strategy

The Sub-Fund aims to replicate the performance of a proprietary index , which is a UCITS compliant index providing exposure to a broad and diversified basket of commodities. In particular, the strategy is exposed to those commodity-heavy themes that are believed to be at the forefront of the transition, such as electrification, green mobility, materials substitution as well as recycled materials. It does not invest into commodities adversely exposed to the transition such as fossil energy. The investment universe mostly includes technology related metals and biobased materials, some of which are not part of traditional benchmarks.

Investment goal

The Sub-Fund is actively managed. The Bloomberg Commodity is used for performance and internal risk indicators comparison, without implying any particular constraints to the sub-fund investments. In addition, the Bloomberg Industrial Metals Subindex Total Return may also be used for performance comparison as well as for internal risk monitoring purposes. The objective is to focus on the supply/demand chain opportunities driven by the net zero economy transition.
