Investment strategy

The Fund invests in financial derivative instruments ('FDIs') with UBS AG, London Branch ('UBS') as counterparty. The Fund may also invest in securities (e.g. company shares and bonds issued by companies and governments). Under the terms of the FDIs, the performance of the Index is swapped from UBS to the Fund, and in return the performance of the securities is swapped from the Fund to UBS - consequently, the Fund's performance reflects the performance of the Index and is not impacted by the performance of the securities The Index provides an exposure to the difference in performance of two commodity indices. Its objective is therefore not to directly track movements in commodity markets. The Index also utilises leverage, meaning that its value may rise or fall more than the difference in performance of the two commodity indices to which it has exposure.

Investment goal

The objective of the Fund is capital appreciation. The Fund tracks the daily performance of a commodity index, called the UBS CM-BCOM Outperformance Strategy Index ex-Precious Metals 2.5 Leveraged Net of Cost Total Return (the 'Index'), less fees and costs and consequently is passively managed.
