JPMorgan Funds - Climate Change Solutions Fund C (dist) - EUR / LU2394010826 / A3C7UM / JPMorgan AM (EU)

Investment strategy

Uses the ThemeBot which, through natural language processing, determines textual relevance and revenue attribution to identify companies exposed to the theme of climate change solutions and its related sub-themes. Using the results of Themebot as the basis for company selection, applies an active, bottom-up investment approach to stock selection, drawing on a fundamental research-based investment process.

Investment goal

To achieve a return through investing in companies with exposure to the theme of climate change solutions. Companies that have been identified by the Investment Manager, at the time of purchase, as best positioned to develop solutions to address climate change, by being significantly engaged in developing such solutions, whilst not significantly harming any environmental or social objectives and following good governance practices. The Sub-Fund has sustainable investment as its objective and the Investment Manager considers the investee companies as qualifying as "sustainable investments" for the purposes of SFDR.
