Investment strategy

To achieve the aim, the fund will invest in transferable securities and enter into financial contracts (derivatives) with one or more counterparties relating to the transferable securities and the net or gross total return version of the index (swap index), in order to obtain the return on the swap index. The gross total return version of the index calculates the performance of the stocks assuming that all dividends and distributions are reinvested on a gross basis. The swap index shall be selected in the absolute discretion of the Investment Manager.

Investment goal

The fund is passively managed. The aim is for your investment to reflect the performance of the S&P 500 Index (index) which is designed to reflect the performance of shares of 500 companies representing all major US industries. The index contains shares of large companies traded on certain eligible US exchanges.
