Amundi MSCI World II UCITS ETF EUR A. / FR0014003IY1 / LYX9ZB / Amundi AM (FR)

Investment strategy

The Fund aims to achieve its objective through indirect replication, namely by entering into one or more OTC negotiated futures contracts (forward financial instruments, "FFI"). The Fund may invest in a diversified portfolio of international equities, the performance of which will be exchanged for that of the Benchmark through FFI.

Investment goal

The Fund is a passively managed index-based UCITS. The objective of the Fund's management is to replicate, both upwards and downwards, the performance of the USD-denominated MSCI World Net Total Return index (net dividends reinvested) (the "Benchmark"), which is representative of the performance of large and mid-cap companies in all developed countries, while keeping the tracking error between the performance of the Fund and that of the Benchmark to a minimum.
