Investment strategy

The fund is actively managed and invests at least two-thirds of its assets in investment grade bonds and high yield bonds issued by governments, government agencies, supra-nationals and companies worldwide, including emerging market countries. The fund may invest in excess of 50% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds), up to 20% of its assets in asset backed securities and mortgage-backed securities, up to 10% of its assets in convertible bonds (including contingent convertible bonds), and up to 10% of its assets in open-ended investment funds. The investment manager aims to mitigate losses by diversifying the fund's asset allocation away from areas of the market identified as having a high risk of material negative return. The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus). The fund may take short positions.

Investment goal

The fund aims to provide income and capital growth by investing in bonds issued by governments and companies worldwide. The fund aims to mitigate losses in falling markets. The mitigation of losses cannot be guaranteed.
