Investment strategy

The portfolio manager has discretion to construct the portfolio and is not bound by the benchmark in terms of equities and weighting. The investment fund is actively managed in relation to the benchmark MSCI China 10/40 (net div. reinv.). The benchmark is used for portfolio composition, performance comparison and risk management purposes. The investment fund may invest in Chinese A-Shares through the Hong Kong-Shanghai Shenzhen Stock Connect ('Stock Connect') programme. This sub-fund promotes environmental and/or social characteristics but does not pursue a sustainable investment objective.

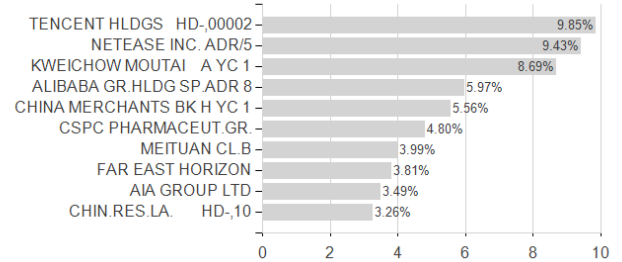

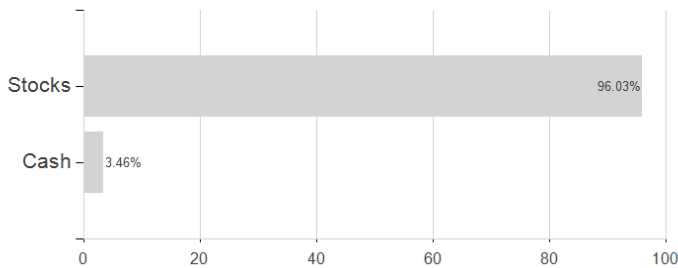

Investment goal

The actively managed investment fund invests primarily in equities of Chinese companies. The portfolio is primarily focused on large cap stocks, strategically complemented by small and mid cap stocks. Based on sound analysis by our local investment specialists, the fund manager combines carefully selected equities of various companies from different countries and sectors with the aim of taking advantage of interesting return opportunities while keeping risks under control.
