Protea Fund - BAM Swiss Equities I CHF / LU2264701074 / PROT31 / FundPartner Sol.(EU)

Investment strategy

The Sub-Fund is actively managed. The index MSCI Switzerland 10/40 Net Total Return is used for the calculation of the performance fee (payable to the investment manager). The benchmark index of the Sub-Fund is MSCI Switzerland 10/40 Net Total Return. It is mentioned for performance comparison purposes. The Sub-Fund does not track the index and can deviate significantly or entirely from the benchmark index. The return of the product is determined using the Net Asset Value (the 'NAV') calculated by the Central Administration. This return depends mainly on the market value fluctuations of the underlying investments as described below. The Sub-Fund will mainly invest in equities and equity related securities of companies which are domiciled, headquartered or exercise their main activity in Switzerland.

Investment goal

This Sub-Fund is a medium risk vehicle aiming to provide growth of capital by investing primarily in a portfolio of Swiss equities. It may be suitable for investors who are seeking long term growth potential offered through investment in equities and are more concerned with maximising long term returns than minimising possible short-term losses. The investment horizon should be at least 3-5 years. The Sub-Fund objective is to outperform the MSCI Switzerland 10/40 Net Total Return in CHF. There can be no assurance that the investment objective will be achieved.
