Investment goal

The Sub-Fund's investment objective is to seek attractive long-term capital growth, measured in US dollars (USD), by investing in equities of global companies identified as quality compounders by the Investment Manager, based on fundamental features including but not limited to proven winning business models with attractive capital returns, consistent shareholder return policies, improving ESG credentials, and sustained high relative free cash flow generation. The Sub-Fund will invest at least two-thirds of its net assets in worldwide developed markets equities and equity-related securities (including but not limited to Real Estate Investment Trusts (REITs), depositary receipts) of global companies offering above market average dividend growth prospects. The choice of investments will neither be limited by geographical area (except a maximum of 20% of the Sub-Fund's net assets in emerging countries), economic sector nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a specific focus may be put on a single country (or some countries) and/or on a single currency and/or on a single economic sector.
