Investment strategy

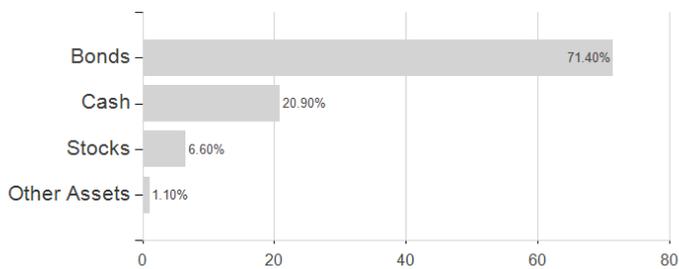

The allocation of the portfolio between the different eligible asset classes, within the meaning of Article 41(1) of the Law of 2010, may vary according to the Investment Manager's expectations being understood that the Sub-Fund will invest: - at all times at least 51% of its net assets in such asset's classes, - in securities of issuers that are incorporated under the laws of, and/or have their registered office in, and/or that derive the predominant part of their economic activity from countries of the EEA, Switzerland, USA and/or Canada. The investment policy will be flexible in terms of currency, rating and sector allocation. The Sub-Fund may also invest in American, European and International/ Global Depositary Receipts, respectively ADRs, EDRs or IDR/ GDRs, where underlying securities are issued by companies domiciled in any emerging or frontier countries and then traded on a Regulated Market outside the respective emerging or frontier countries, mostly in the USA or Europe.

Investment goal

The investment strategy is based on risk spreading as a means of diversifying investments and makes an extensive use of options and derivatives to reduce the overall portfolio risk. The use of financial derivative instruments, such as call and put options, will be mostly used to reduce the risk. The Sub-Fund is actively managed.
