Investment strategy

To achieve this, the Compartment is invested for at least 75% of its assets in equity and equity equivalent securities of any country, without constraints of capitalization. Among this proportion of 75% of its assets, the Compartment may invest in China A shares via Stock Connect within a maximum of 25% of its assets. The Compartment's equity exposure will be between 75% and 120% of its assets. Derivative instruments may be used by the Compartment for hedging, arbitrage, exposure purposes and/or efficient portfolio management.

Investment goal

The investment objective is to outperform global equity markets over a long-term period (minimum of five years) by investing in shares of companies which either establish or benefit - fully or partly - from disruptive business models. The best-in-class approach does not exclude any sector of activity in principle. All economic sectors are therefore represented in this approach and the Compartment may therefore be exposed to some controversial sectors.
