Investment strategy

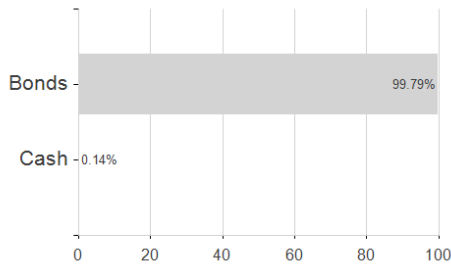

The fund is actively managed. The investment universe for the main investments is the benchmark index, deviations from the investments and investment weightings in the benchmark index are permitted. At least 70% of the investments are part of the asset manager's sustainable investment universe.

Investment goal

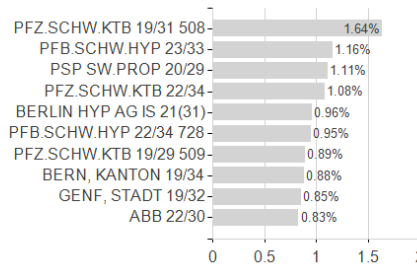

The fund's chief investment objective is to generate current income and ensure the long-term preservation of the capital. This is achieved principally by means of direct investments in Swiss franc-denominated fixed or variable-rate bonds issued by debtors worldwide.
