Investment strategy

The Sub-Fund follows a balanced investment strategy with Euro as reference currency. The currency designation contained in the name of the Sub-Fund indicates only the currency in which the Net Asset Value of the Sub-Fund is calculated and not the investment currency of the Sub-Fund. Investments are made in the currencies that are best suited to the performance of the sub-fund. Investments may be made globally, in all freely tradable currencies and in all economic sectors which, in the opinion of the Asset Manager, are particularly suitable for the appreciation of the Sub-Fund's assets. In accordance with the principle of risk diversification, the sub-fund invests in a broadly diversified securities portfolio consisting of equities, bonds and other investments permitted within the framework of the investment regulations and investment restrictions set out herein. The sub-fund invests a minimum of 20% and a maximum of 70% of its assets worldwide at all times, directly or indirectly, in equities or equity-like securities in all industries and sectors, including real estate equities.

Investment goal

The investment objective of the Sub-Fund is primarily the preservation and long-term growth of capital in real terms through interest and dividend income and through capital appreciation. This is an actively managed Sub-Fund without reference to a benchmark. No assurance can be given that the investment objective will be achieved.
