Investment strategy

The DJE - Gold & Ressourcen ("sub-fund") is an equity fund. The sub-fund invests its assets mainly in equities, whereby it invests to a significant extent in equities of companies that are engaged in the production, processing and sale of gold. Apart from that the sub-fund may invest in stocks issued by companies engaged in other sectors of other primary resources, in securities which track the performance of such commodities 1:1, in bonds and bank deposits (<50%) and other funds (max. 10%). Apart from the aforementioned constraints the composition of the fund will be actively managed i.e. independently of any constraints regarding benchmarks, countries, duration, rating and market capitalization under consideration of ESG factors. The subfund may use financial instruments, whose value depends on future prices of other assets (derivatives) for hedging and capital appreciation purposes.

Investment goal

The purpose is to generate capital appreciation over the long term.
