BGF Latin American Fund A2 GBP / LU0171289738 / A0BL3Z / BlackRock (LU)

Investment strategy

The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).

Investment goal

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets. The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, Latin America. The term Latin America refers to Mexico, Central America, South America and the islands of the Caribbean, including Puerto Rico. The Fund may indirectly invest in emerging markets by investing in American Depository Receipts (ADRs) and Global Depository Receipts (GDRs), which are listed or traded on stock exchanges and regulated markets outside emerging markets. ADRs and GDRs are investments issued by financial institutions which give exposure to underlying equity securities.
