

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Global Corporate Sustainable Bond Fund, a US Dollar denominated sub fund of the Aberdeen Standard SICAV I, I Acc Hedged CHF Shares (ISIN: LU2177011801). This fund is managed by abrdn Investments Luxembourg S.A.**

## OBJECTIVES AND INVESTMENT POLICY

### Investment Objective

The Fund aims to achieve a combination of income and growth by investing in corporate bonds (loans to companies) issued worldwide including Emerging Market countries which adhere to the abrdn "Global Corporate Sustainable Bond Investment Approach" (the "Investment Approach").

The Fund aims to outperform the Bloomberg Global Aggregate Corporate Bond (hedged to USD) Index before charges.

### Investment Policy

#### Portfolio Securities

- The Fund invests at least 90% in bonds issued by corporations and governments anywhere in the world, including sub-sovereigns, inflationlinked, convertible, asset backed and mortgage backed bonds.

- The Fund invests at least 80% in investment grade corporate bonds issued anywhere in the world.

- The Fund may invest up to 20% in sub-investment grade bonds.

- Non-Dollar denominated bonds will typically be hedged back to US Dollars.

- Investment in bonds will follow the Investment Approach.

- This approach utilises abrdn's fixed income investment process, which enables portfolio managers to qualitatively assess how ESG factors are likely to impact on the company's ability to repay its debt, both now and in the future. To complement this research, the abrdn ESG House Score is used to quantitatively identify and exclude those companies exposed to the highest ESG risks. In addition, abrdn apply a set of company exclusions, which are related to the UN Global Compact, State Owned Enterprises (SOE), Weapons, Tobacco, Thermal Coal, Oil & Gas and Electricity Generation.

- Green bonds, Social bonds or Sustainable bonds issued by companies otherwise excluded by the environmental screens are permitted, where the proceeds of such issues can be confirmed as having a positive environmental impact.

- Further detail of this overall process is captured within the Investment Approach, which is published at [www.abrdn.com](http://www.abrdn.com) under "Fund Centre".

- This approach is expected to reduce the investment universe by a minimum of 15%.

- Financial derivative instruments, money market instruments and cash may not adhere to this approach.

#### Management Process

- The Fund is actively managed.

- Through the application of the Investment Approach, the Fund has an expected minimum of 15% in Sustainable Investments. It also targets an ESG rating that is equal to or better, and a meaningfully lower carbon intensity, than the benchmark.

- Engagement with external company management teams is used to

evaluate the ownership structures, governance and management quality of those companies, in order to inform portfolio construction. As part of this, up to 5% of asset may be invested in companies in high carbon emitting sectors, which are seen as having ambitious and credible targets to decarbonise their operations, in order to support their transition to ultimately comply with the environmental screens.

- The benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints, but does not incorporate any sustainable criteria.

- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark. Due to the Fund's risk constraints, its performance profile is not ordinarily expected to deviate significantly from that of the benchmark over the longer term.

#### Derivatives and Techniques

- The Fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

## RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 4 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- The fund invests in emerging market equities and / or bonds. Investing

in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet

redemptions in a timely manner. The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration. Where the share class is described as "hedged", currency hedging

techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	0.69%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser. The ongoing charges figure is at 30/09/2021. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking. A switching charge may be applied in accordance with the Prospectus. For more information about charges, please see the Prospectus which is available at [www.abrdn.com](http://www.abrdn.com).

## PAST PERFORMANCE

Global Corporate Sustainable Bond Fund, I Acc Hedged CHF Shares, 31 December 2021

Past performance is not a guide to future performance. Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section. Performance is calculated in CHF. The fund was launched in 2020. The share/unit class was launched in 2020. Benchmark - Bloomberg Global Aggregate Corporate Bond Index (Hedged to CHF).
