Incorporation

abrdrn SICAV II (the Company) (formerly Aberdeen Standard SICAV II) was incorporated as a "société d'investissement à capital variable" (SICAV) on 16 November 2000 for an unlimited period and commenced operations on 1 December 2000. It is registered under number B 78.797 with the Luxembourg Trade and Companies Register.

As at 31 December 2023, the Company has issued shares in the following sub-funds:

Absolute Return Global Bond Strategies Fund
Emerging Market Local Currency Debt Fund
Euro Corporate Bond Fund
Euro Corporate Sustainable Bond Fund
Euro Government All Stocks Fund
European Smaller Companies Fund
Global Corporate Bond Fund
Global High Yield Bond Fund
Global Impact Equity Fund
Global Inflation-Linked Government Bond Fund
Global Real Estate Securities Sustainable Fund
Global Risk Mitigation Fund
Global Short Dated Corporate Bond Fund
Global Smaller Companies Fund
Multi-Asset Climate Opportunities Fund
Total Return Credit Fund

The full name of each sub-fund is constituted by the name of the Company, abrdrn SICAV II, followed by a hyphen and then the specific name of the sub-fund. Throughout the Financial Statements, the sub-funds are referred to by their short names as indicated above.

No subscriptions can be received on the basis of this document. Subscriptions are only valid if made on the basis of the current prospectus or on the Key Investor Information Document, accompanied by a copy of the latest annual report or of the subsequent semi-annual report if it has been published.

Please see the Notes to the Financial Statements for changes during the year.

Statement of Changes in Portfolio

A statement giving the changes in the Schedule of Investments for the year ended 31 December 2023 can be obtained free of charge from the registered office of the Company.

Report of the Board of Directors

As at 31 December 2023, the total net assets of abrdn SICAV II (the "Company") stood at USD 12,265,938,000.

The Company aims to provide the shareholder with a choice of professionally managed sub-funds investing in a wide range of transferable securities and/or other permitted assets in order to achieve an optimum return from capital invested, while reducing investment risk through diversification. As at 31 December 2023, there are 16 active sub-funds in total, each with its own specific investment objectives and individual portfolios, offering investors the opportunity of exposure to selected areas or to conveniently build a diversified global stock and bond portfolio to meet specific investment goals.

The overall strategy of the Company and the separate sub-funds is to seek diversification through investment primarily in transferable securities.

The Board of Directors adheres to the Association of the Luxembourg Fund Industry ("ALFI") code of conduct for Luxembourg investment funds (revised June 2022). The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds. The Board considers that it has been in compliance with the Principles of the Code in all material respects for the year ended 31 December 2023.

The Board of Directors

Report on the audit of the financial statements

Opinion

We have audited the financial statements of abrdn SICAV II (formerly Aberdeen Standard SICAV II) and each of its sub-funds ("the Fund"), which comprise the Statement of Net Assets and the Schedule of Investments as at 31 December 2023 and the Statement of Operations and Changes in Net Assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of abrdn SICAV II (formerly Aberdeen Standard SICAV II) and each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of *réviseur d'entreprises agréé* for the audit of the financial statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the *réviseur d'entreprises agréé* for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Report of the *réviseur d'entreprises agréé* (continued)

Responsibilities of the "*réviseur d'entreprises agréé*" for the audit of the financial statements (continued)

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- * Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- * Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- * Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- * Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "*réviseur d'entreprises agréé*" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "*réviseur d'entreprises agréé*". However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-funds where a decision or an intention to close exists) to cease to continue as a going concern.
- * Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Overview

Global equities

Global stock markets rose strongly over the 12 months. After central banks in Western economies had raised interest rates faster and much further than previously anticipated to counter multi-decade-high inflation, inflationary pressures lessened in many countries over the course of 2023. Meanwhile, global economic growth held up better than many investors expected, defying fears of a recession triggered by higher rates. As US and eurozone inflation continued to trend down, investor hopes rose that an end to interest-rate rises could be in sight. Therefore, 2023 started with strong stock market gains. However, the collapse of two regional US banks and the forced sale of Credit Suisse to rival UBS in March then evoked fears of a banking crisis. Despite an initial sell-off, stock markets recovered. After more market volatility in April and May, equities performed strongly over June and July due to news of a compromise agreement on the US debt ceiling and further encouraging inflation data. Nevertheless, rhetoric from central banks remained hawkish. Equities then generated negative returns in August, September, and October on concerns that interest rates would stay higher for longer. However, equities notably recovered in November and December as reassuring inflation trends led to investors looking ahead to the prospect of rate cuts in 2024.

UK

The UK stock market, as represented by the FTSE All-Share Index, recorded a gain over the period. The FTSE 100 Index, home of multinational companies, and the FTSE 250 Index, which contains smaller companies typically more focused on the domestic UK economy, both rose by a similar amount. The performance of the FTSE 100 Index lagged those of many overseas markets given it is home to many so-called defensive shares. It also contains several energy and mining companies; commodity prices, while still historically high, ended the year below the levels reached after the outbreak of the war in Eastern Europe in early 2022. Meanwhile, smaller UK companies were held back for much of 2023 by heightened economic uncertainty. However, they performed strongly towards the end of the year due to stronger investor risk appetite given an improving outlook for the domestic economy. The Bank of England (BoE) announced a further five interest-rate increases in 2023, taking its base rate from 3.50% at the start of the year to 5.25% by the end of it. In 2023, the BoE increased its base rate by 50 basis points (bps) in February, by 25 bps in both March and May, by 50 bps in June and then by 25 bps in August. As a result, UK annual consumer inflation has continued to trend downwards over 2023. However, it has still remained above the BoE's 2% target and the rates recorded in both the US and eurozone, in part due to elevated food prices. Annual core inflation in the UK declined from 5.7% in October to a lower-than-expected 5.1% in November.

US

US share prices, as measured by the broad S&P 500 Index, rose strongly over the 12-month period. Growth-focused stocks, such as technology companies, performed particularly well. These stocks are more sensitive to the prospect of monetary tightening coming to an end, and then reversing, because of the favourable effect on their future discounted earnings. Faced with a relatively robust economy, the US Federal Reserve (Fed) continued to tighten policy in 2023. However, a sustained fall in annual inflation meant that the Fed reduced the size of its rate hikes to 25 bps at its February, March, and May meetings. Nonetheless, the latest 25 bp increase in July took the target range for the fed funds rate to 5.25-5.50%, the highest level since 2001. US stock markets rose steadily over most of the period, even shaking off turmoil in the banking sector in March, when two regional banks, Silicon Valley Bank and Signature Bank, collapsed. In particular, investor sentiment was helped by the long-awaited news in late May of an agreement over raising the US debt ceiling. A strong performance by the technology sector, especially artificial intelligence-related stocks, such as NVIDIA, Microsoft, and Alphabet, was also supportive. Investor concern that interest rates would stay higher for longer led to stocks markedly weakening in August, September, and October. However, equities rebounded notably in November and December as these fears eased due to encouraging inflation trends.

Europe

Continental Europe's stock markets, as measured by the FTSE World Europe ex UK Index, rose strongly over the 12-month period. The region's equity markets had faced various challenges for much of 2022, including surging inflation, higher interest rates and the shock of the Russia-Ukraine war. However, investor sentiment improved at the start of 2023. This was due to declining annual inflation – driven by falling energy prices as supply issues improved – and an unexpectedly resilient European economy, with continued low unemployment. As a result, European equities performed well until the summer of 2023. They then weakened over August, September, and October on concerns about further monetary tightening and slowing economic growth. However, those fears then eased, leading to a notable rebound in equities in November and December. The European Central Bank (ECB) continued to raise rates over the period as it strove to bring the annual inflation rate down to its 2% target. The ECB's 25 bp increase in its key interest rates in September 2023, the sixth hike of the year, took the base rate to 4.50%. Against this backdrop, annual inflation rose from 2.4% in November to a lower-than-expected 2.9% in December, a preliminary estimate showed. Meanwhile, according to a third estimate, the eurozone economy shrank by 0.1% in the third quarter of 2023. This was the first contraction in the region's GDP since the final quarter of 2022.

Asia Pacific

Stock markets in the Asia Pacific (excluding Japan) region gained over the 12-month period. This positive trend was due to signs that high annual inflation globally was beginning to subside, with fears diminishing that the world economy could be tipped into a recession by interest-rate hikes. However, uncertainty caused by both Russia's invasion of Ukraine and the

Global Overview (continued)

Israel-Hamas conflict capped stock-market returns. Share prices continued to rise sharply in China over January, driven by the reopening of the Chinese economy and indications that the latest wave of Covid-19 infections had peaked. These positive developments in the region's largest economy helped other Asian stock markets enjoy a strong first quarter of 2023. However, from April to the end of the year, Chinese share prices more than relinquished their post-reopening gains. This reversal was due to renewed investor concerns about the country's highly indebted property sector, geopolitical tensions with the US and an ongoing regulatory crackdown (which focused on data privacy and national security). Chinese equities continued to weaken, despite authorities announcing various stimulus measures aimed at boosting investor sentiment. In contrast, the Taiwanese and South Korean stock markets both recorded impressive gains over the course of 2023, helped by their relatively high weightings to the technology sector.

The Japanese stock market, as measured by the TOPIX Index, recorded a strong gain over the 12-month period. The Bank of Japan (BoJ) still faced milder inflationary pressures than the world's other major central banks, so it left its key interest rate unchanged at -0.1% and the target for the 10-year government bond yield at around 0% over the period. After new BoJ Governor Ueda, who succeeded Governor Kuroda in April 2023, stressed his commitment to an ultra-loose monetary policy, the Japanese yen steadily weakened (leading to speculation of currency-market intervention). With annual core inflation of 3.3% in June – still above the BoJ's 2% target – the central bank decided to make its yield-curve control policy more flexible at its July meeting. Annual core inflation then declined from 3.1% in August to a still-higher-than-expected 2.8% in September. As a result, the BoJ further tweaked its yield-curve control policy at its October meeting. Annual core inflation fell from 2.9% in October to 2.5% in November, as expected, but remained higher than the central bank would like. Solid company results and an increased focus by Japanese companies on shareholder returns helped share prices climb higher over the year. However, the Japanese economy shrank by a worse-than-expected 0.7% in the third quarter of 2023, translating into a contraction of 2.9% on an annualised basis, given weak domestic consumption and an uncertain global economic backdrop.

Emerging markets

Emerging-market equities ended an extremely challenging year with double-digit gains, though they lagged developed markets. Sentiment was driven largely by interest-rate expectations and China's economic outlook. Successive interest-rate hikes from the Fed to tame inflation initially sparked recession fears. As the year progressed, investors grew hopeful of interest rates nearing a peak and the US economy being on track for a soft landing.

Meanwhile, optimism surrounding China's post-Covid-19 reopening fizzled as economic data missed investors' high expectations. Authorities rolled out proactive policies to help the economy, particularly the troubled property sector. Green shoots for a prolonged economic recovery emerged as the measures filtered through, but investors remained on the sidelines, waiting for a more sustainable and meaningful rebound. Chinese stocks ended the year as notable laggards, even as all other major emerging markets advanced.

Bond markets

Global government bonds had steadier performance over the 12-month period. After years of record-low interest rates, many central banks have now significantly raised rates in an effort to contain inflation. Following a major sell-off in 2022, government bond markets recovered in 2023. This was driven by expectations of an end to interest-rate hikes and anticipations of potential rate cuts in 2024. Faced with falling, but still-high, annual inflation, the Fed continued to raise rates in 2023. It hiked them by 25 bps in February, March, and May. However, with increasing signs that its policy was having an impact on reducing the rate of price increases, the Fed then paused its tightening campaign in June before announcing another 25-bp hike in July. The BoE increased its base rate a further five times over the course of 2023. It raised it by 50 bps in February, 25 bps in both March and May, another 50 bps in June and then 25 bps in August. As a result, annual inflation in the UK has continued to fall in recent months. However, the UK's central bank has not yet ruled out further rate hikes. While inflationary pressures in the eurozone eased somewhat as 2023 progressed, they remained elevated. As a result, the ECB continued to raise rates, with further 50-bp increases in February and March being followed by 25-bp hikes in May, June, July, and September. In contrast, the Japanese central bank maintained its ultra-loose monetary policy, marked by a negative base rate, arguing that underlying demand in the Japanese economy remained weak. However, the BoJ tweaked its yield-curve control policy at its July and October meetings by effectively raising the cap for the allowance band from 0.5% to 1.0% while saying that the upper bound was merely a reference point, rather than a strict limit.

Corporate bond prices had a solid performance over the 12-month period, although investment-grade bonds underperformed riskier high-yield bonds. A backdrop of sharply rising interest rates, stubbornly high annual inflation and a worsening economic outlook had created challenging market conditions and reduced investor risk appetite for much of 2022. However, from the start of 2023 onwards, credit spreads – the yield premium received by investors in return for the typically greater risk of lending to companies rather than governments – tightened on growing expectations that global inflation pressures may be peaking. This fuelled investors' hopes that the current cycle of interest-rate rises could be nearing its end and helped corporate bonds to perform better as investors' appetite for riskier assets started to return. Turbulence in the global banking sector in March then caused credit spreads to widen to levels last seen in the autumn of 2022. However, the negative effect of wider credit spreads was offset by lower government bond yields amid a flight to safety. Calm then returned to bond markets over the next few months, with spreads tightening to end the period lower than where they were before March's volatility. Corporate bond markets had strong months in November and December.

Global Overview (continued)

Outlook

Global equity markets are likely to face enduring challenges, marked by subdued growth as a result of the implementation of tighter monetary policy by developed-market central banks. Investor apprehensions are heightened by geopolitical tensions in Ukraine and the Middle East, along with concerns about the fragility of the Chinese economy. Nonetheless, December witnessed a robust market performance, driven by positive inflation indicators, fostering optimism that major central banks may initiate interest-rate cuts in 2024.

In fixed income markets, the Fed, BoE, and ECB maintained their rates during their December meetings. The BoE, in reiterating its stance, emphasised the necessity for monetary policy to remain "sufficiently restrictive" for a "sufficiently long" period to steer inflation back to the 2% target in the medium term. The ECB adjusted its inflation forecasts downward, expressing expectations of weaker growth, while maintaining its commitment to hold rates until inflation is under control.

Fund returns: Source: Factset, Basis: performance is calculated over the stated period on the share price performance basis, based on the noted share class, net of annual charges and inclusive of reinvested income. Exceptions being the European Smaller Companies Fund, the Multi-Asset Climate Opportunities Fund, and the Responsible Global Asset Strategies Fund which are based gross of fees.

Performance History (continued)

Benchmark returns: Source: Individually disclosed, Basis: The benchmark returns are quoted gross and contain no adjustment for fees. Exception being the Global Real Estate Securities Sustainable Fund which has a benchmark quoted net of fees.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

The performance data does not take account of the commissions and costs incurred on the subscription and redemption of shares.

Performance is calculated at each period end unless otherwise stated, gross of expenses.

The Morningstar Analyst Rating for Funds is a forward-looking analysis of a fund. Morningstar has identified five key areas crucial to predicting the future success of a fund: People, Parent, Process, Performance, and Price. The pillars are used in determining the Morningstar Analyst Rating for a fund. Morningstar Analyst Ratings are assigned on a five-tier scale running from Gold to Negative. The top three ratings, Gold, Silver, and Bronze, all indicate that our analysts think highly of a fund; the difference between them corresponds to differences in the level of analyst conviction in a fund's ability to outperform its benchmark and peers through time, within the context of the level of risk taken over the long term. Neutral represents funds in which our analysts don't have a strong positive or negative conviction over the long term and Negative represents funds that possess at least one flaw that our analysts believe is likely to significantly hamper future performance over the long term. Long term is defined as a full market cycle or at least five years. Past performance of a security may or may not be sustained in future and is no indication of future performance. For detailed information about the Morningstar Analyst Rating for Funds, please visit [http://global.morningstar.com/manager disclosures](http://global.morningstar.com/manager%20disclosures) may not be sustained in future and is no indication of future performance. For detailed information about the Morningstar Analyst Rating for Funds, please visit [http://global.morningstar.com/manager disclosures](http://global.morningstar.com/manager%20disclosures).

^{*} This sub-fund is not authorised in Hong Kong and is not available to Hong Kong residents.

[†] Source: abrdn plc.

The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Key Information Document will be updated to reflect current changes.

¹ See note 1.1.

² See note 3.b.

³ Currency was GBP until 30 June 2022 and USD since 01 July 2022.

* A perpetual bond is a bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.

† Managed by subsidiaries of abrdn plc.

Currently forward positions are not collateralised.

The accompanying notes form an integral part of these financial statements

Notes to the Financial Statements

1. Presentation

a) Organisation

abrdrn SICAV II (the "Company") (formerly Aberdeen Standard SICAV II) was incorporated under the laws of the Grand Duchy of Luxembourg on 16 November 2000 as a "Société d'Investissement à Capital Variable" ("SICAV") with multiple sub-funds for an unlimited period.

The Company has received approval from the Luxembourg authorities for registration under Part I of the law of 17 December 2010, as amended, relating to Undertakings for Collective Investment in Transferable Securities (the "UCITS Law") in conformity with Directive 2009/65/EC (the "UCITS Directive"). The Company is not a self-managed SICAV. A management company was appointed on 1 July 2013.

The legal notice ("notice légale") required by Luxembourg laws in connection with the issue and sale of shares in the Company has been deposited with the Registrar of the District Court of Luxembourg (the "Registrar"). The Company's articles of incorporation have also been deposited with the Registrar and have been published in the Recueil des Sociétés et Associations (the "Mémorial") on 19 December 2000. The Company has been registered under number B 78.797 at the Luxembourg Trade and Companies Register.

The Company's financial year starts on 1 January and ends on 31 December of each year.

As at 31 December 2023, there were 16 separate active sub-funds, providing shareholders with the opportunities for investment in a wide variety of markets, securities, and currencies.

b) Presentation of the financial statements

The accompanying financial statements present the assets and liabilities of the individual sub-funds and of the Company taken as a whole. The financial information of each individual sub-fund is expressed in the currency designated in the prospectus for that particular sub-fund and the combined statements of the Company are expressed in US Dollars ("USD"). The financial statements have been prepared in accordance with Luxembourg GAAP, applicable to Undertakings for Collective Investment Funds, and with the format prescribed by the Luxembourg authorities for Luxembourg investment companies.

The combined statements were calculated on the basis of aggregation of individual sub-funds statements with no elimination of cross-investments if any. As of 31 December 2023, there was no cross-investments within the sub-funds.

As the financial statements are produced at a valuation point that is different from the daily dealing Net Asset Values ("NAVs") calculated on 31 December 2023, the NAVs shown throughout the report may differ from those advertised on 29 December 2023 for dealing in the sub-funds. Those NAVs may include dividend declarations effective for the distribution on 31 December 2023 and certain accounting adjustments relating to the year ended 31 December 2023.

The financial statements of the sub-funds have been prepared on a going concern basis, except for the sub-funds closed to investors during the year (disclosed in the table below) which have been prepared on a non-going concern basis:

Sub-fund closures

Sub-fund	Base currency	Closure date
Emerging Market Government Bond Fund	USD	4 July 2023
European Equities Fund	EUR	4 October 2023
Global Equities Fund	USD	4 October 2023
Japanese Equities Fund	JPY	4 October 2023
Responsible Global Asset Strategies Fund	EUR	27 September 2023

As at 31 December 2023, the liquidation of some of the above sub-funds is not complete. There are remaining cash balances that will be used to cover outstanding liabilities, as follows:

Sub-fund	Base currency	Cash balance
Emerging Market Government Bond Fund	USD	1,330
European Equities Fund	EUR	14,044
Global Equities Fund	USD	59,178
Japanese Equities Fund	JPY	2,656,036
Responsible Global Asset Strategies Fund	EUR	584,771

Notes to the Financial Statements (continued)

2. Accounting Policies

a) Accounting convention

These financial statements are prepared in accordance with Luxembourg regulations applicable to Undertakings for Collective Investment Funds. The financial statements have been prepared under the historical cost convention modified by the revaluation of investments.

b) Investment Valuation

In determining the value of the assets of the Company, each security and money market instrument listed on a recognised stock exchange or dealt on any other regulated market that operates regularly, is recognised and is open to the public, will be valued at their latest available prices at close of business on 31 December 2023. In the event there should be several such markets, they will be valued on the basis of their latest available prices on the main market for the relevant security.

Securities and money market instruments not listed or traded on a stock exchange or not dealt on another regulated market will be valued at their fair value at which it is expected they may be resold as determined prudently and in good faith by the Board of Directors. Suspended or delisted securities held at 31 December 2023 have been valued at fair value as instructed by the Valuation and Pricing Committee, details of these securities are included in Schedule of Investments.

All other securities and other assets will be valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors.

In the event that the latest available price does not, in the opinion of the Board of Directors, truly reflect the fair market value of the relevant securities and money market instruments, the value of such securities will be defined by the Board of Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith.

In accordance with the Company prospectus, the fair value adjustment mechanism is applicable whenever a triggering event occurs. During the year, no fair value adjustments were applied to any of the sub-funds.

Mortgage and other asset backed securities are independently priced using appropriate models and certain corporate bonds may be priced using indicative broker quotes.

The liquidating value of future, forward or options contracts, if any, traded on exchanges or on other regulated markets shall be based upon the last available settlement prices of these contracts on exchanges and regulated markets on which the particular future, forward or options contracts are traded by the Company; provided that if a future, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors may deem fair and reasonable.

c) Investment Income

Interest is accrued on a day-to-day basis. In the case of debt securities issued at a discount or premium to maturity value, the total income arising on such securities, taking into account the amortisation of such discount or premium on an effective interest rate basis, is spread over the life of the security.

Interest income on bonds may be received either in cash or as a Payment in Kind ("PIK"). Where a PIK bond settles physically (either because it matures, or it pays interest) the interest income is recognised as the lower of the market value and the nominal value of the settlement.

In the event where there is no physical settlement, the factor change on that holding is recognised as interest income in the Statement of Operations and Changes in Net Assets at the point when the factor change occurs.

Dividends are accounted for on an ex-dividend basis. Interest and dividend income are stated net of irrecoverable withholding taxes, if any.

Bank interest income is accounted for on an accrual basis. It is composed of interest on bank account and interest on term deposits.

d) Foreign exchange

The books and records of each sub-fund are denominated in the base currency of the corresponding sub-fund. Amounts denominated in other currencies are translated into the base currency on the following basis:

(i) investment valuations and other assets and liabilities initially expressed in other currencies are converted on each business day into the base currency using exchange rates prevailing on each business day; and

(ii) purchases and sales of foreign investments, income and expenses are converted into the base currency using currency exchange rates prevailing on the respective dates of such transactions.

Notes to the Financial Statements (continued)

2. Accounting Policies (continued)

d) Foreign exchange (continued)

The combined statements correspond to the sum of the statements of each sub-fund, converted to USD. The combined figures in the Statement of Operations and Changes in Net Assets have been calculated using the exchange rates ruling at the year-end date. The resulting foreign exchange adjustment of USD 321,718,000 represents the movement in exchange rates between 31 December 2022 and 31 December 2023. This is a notional amount, which has no impact on the net assets of the individual sub-funds.

Realised and unrealised exchange differences on the revaluation of foreign currencies are taken to the Statement of Operations and Changes in Net Assets.

Main exchange rates used as at 31 December 2023 are as follows:

1 USD =	1.465524	AUD	1 USD =	157.010520	KES
1 USD =	4.857599	BRL	1 USD =	1287.896350	KRW
1 USD =	1.318600	CAD	1 USD =	455.788514	KZT
1 USD =	0.841650	CHF	1 USD =	16.934514	MXN
1 USD =	873.286176	CLP	1 USD =	4.594997	MYR
1 USD =	7.120580	CNH	1 USD =	10.155687	NOK
1 USD =	7.120580	CNY	1 USD =	1.579405	NZD
1 USD =	3874.001960	COP	1 USD =	3.702607	PEN
1 USD =	22.349365	CZK	1 USD =	55.374052	PHP
1 USD =	6.748367	DKK	1 USD =	3.932255	PLN
1 USD =	58.058523	DOP	1 USD =	4.503592	RON
1 USD =	30.925285	EGP	1 USD =	10.077801	SEK
1 USD =	0.905264	EUR	1 USD =	1.319099	SGD

1 USD =	7.808535	HKD	1 USD =	29.534245	TRY
1 USD =	346.005197	HUF	1 USD =	30.690851	TWD
1 USD =	15396.458814	IDR	1 USD =	38.150465	UAH
1 USD =	3.600905	ILS	1 USD =	39.039625	UYU
1 USD =	83.215445	INR	1 USD =	18.287553	ZAR
1 USD =	140.980094	JPY			

e) Realised gains and losses on investments

A realised investment gain or loss is the difference between the historic average cost of the investment and the sale proceeds. These are converted into the base currency using currency exchange rates prevailing on the respective dates of the sale transactions.

f) Forward foreign exchange contracts

Unsettled forward foreign exchange contracts are valued using forward rates of exchange applicable at the year-end date for the remaining period until maturity. All unrealised gains and losses are recognised in the Statement of Operations and Changes in Net Assets. Currently forward positions are not collateralised.

The quoted leverage excludes the impact of the foreign exchange forwards used in currency hedged share classes which are held for those shareholders only. It also excludes the temporary impacts that arise when renewing currency forwards and when closing some exchange cleared derivatives. Although the renewal of currency forwards and closure of exchange traded derivatives results in no change or a reduction in market exposure, gross derivative leverage would increase because new equal and offsetting derivative contracts are traded to facilitate this efficiently. The offsetting contracts are held to their maturity date, which is less than 5 working days for currency forwards.

Notes to the Financial Statements (continued)

2. Accounting Policies (continued)

g) Futures

Futures contracts are valued at the exchange quoted price at close of business on 31 December 2023. Initial margin deposits are made in cash upon entering into futures contracts. During the year the future contract is open, changes in the value of the contract are recognised as unrealised gains and losses by marking to market on a daily basis to reflect the market value of the contract at the end of each day's trading.

Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. Variation margin payments are recorded in the futures margin account in the Statement of Net Assets and related movements on unrealised results are recorded in the Statement of Operations and Changes in Net Assets. When the contract is closed, the sub-fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

h) Swap/Option contracts

Sub-funds may enter into swap agreements such as credit default swaps, interest rate swaps, swaptions, overnight index swaps and inflation linked swaps. Gains or losses resulting from swap contracts are recognised in the Statement of Operations and Changes in Net Assets. Swaps are valued at fair value determined at close of business on 31 December 2023 using external independent third party supplied prices as determined in good faith, pursuant to procedures established by the Board of Directors.

Any outstanding interest accrual on swaps is recorded as either a net receivable or net payable in the Statement of Net Assets. Similarly, the interest received or paid on swaps is disclosed as a net amount in the Statement of Operations and Changes in Net Assets.

Sub-funds may enter into the purchase of call and put options. Gains or losses resulting from option contracts are recognised in the Statement of Operations and Statement of Changes in Net Assets. Options are valued at the exchange quoted price at close of business on 31 December 2023.

3. Share Class Information

a) General

Within each sub-fund, the Company is entitled to create different share classes. These are distinguished by their distribution policy or by any other criteria stipulated by the Directors. Please refer to the prospectus for further details. For a list of current live share classes please visit abrdrn.com.

The sub-funds are valued at 1:00 pm Luxembourg time on each dealing day.

b) UK Reporting Fund Regime

UK Reporting Fund Regime Status is granted prospectively by the UK taxation authorities. It is the intention of the Board of Directors to continue to comply with the requirements of the Reporting Fund Regime for certain share classes.

Equalisation applies only to shares purchased during the distribution period (Group 2 shares).

It is the average amount of income included in the purchase price of Group 2 shares.

Annually and within six months of the year end, the Manager will publish the UK Reporting Regime Report to investors for all share classes granted reporting Fund status on its website (abrdrn.com).

The UK Reporting Regime Report to investors for each share class can also be requested in writing by contacting the Shareholder Service Centre as detailed on the back cover of this report.

c) Swing pricing adjustment

Frequent subscriptions and redemptions can potentially have a dilutive effect on the sub-fund's NAV per share and be detrimental to the long-term investors as a result of the transaction costs that are incurred by the sub-fund in relation to the trades undertaken by the Investment Manager.

The Board of Directors' current policy through delegation to the Investment Managers' Investor Protection Committee (IPC) is to apply a swing pricing adjustment to the NAV of each share class of all sub-funds. A swing factor is applied whenever net subscriptions or redemptions exceed a certain threshold determined by the Board of Directors (having considered prevailing market conditions).

Notes to the Financial Statements (continued)

3. Share Class Information (continued)

c) Swing pricing adjustment (continued)

The swing pricing adjustment will be recorded in the relevant sub-fund's NAV and becomes part of the sub-fund's relevant dealing NAV.

The swing pricing adjustment is a percentage adjustment applied to each share class in a sub-fund on a dealing day determined on the basis of estimates of any dealing charges (including commission and/or other costs) and/or any bid/offer spread that the Board of Directors believes are appropriate to take into account in respect of that sub-fund. Such dealing charges will reflect costs and liabilities not included in the calculation of the NAV of the relevant share class. The adjustment is recorded in the Statement of Net Assets and Statement of Operations and Changes in Net Assets as "adjustment due to swing pricing".

The maximum swing factor rate applied on net subscriptions/redemptions exceeding a certain threshold as at and during the year ended 31 December 2023 was 2.00%. There is no pre-set maximum swing factor, the Directors can raise this limit if necessary to protect the interests of investors.

Further information can be found at www.abrdn.com.

The following sub-fund has applied the above mechanism and the NAV has swung as at 31 December 2022:

Sub-fund	NAV before swing	Swing amount	NAV after swing
Global Absolute Return Strategies Fund	1,129,457	(1,920)	1,127,537

The NAVs as at 31 December 2023 disclosed in this report do not include any swing pricing adjustments.

d) Switches

Except in relation to Global Risk Mitigation Fund, shares in one sub-fund may be exchanged or switched into shares of the same or a different class in another sub-fund or of a different class in the same sub-fund, subject to the qualifications for investment being met, on any dealing day for the relevant sub-funds. Shares of Global Risk Mitigation Fund may be switched into shares of the same or a different class in the same sub-fund. Shares in the same class may be switched between accumulation and distribution shares within the same class. Investors may switch either a specific number of shares or shares of a specified value. For full details on switching contact the Global Distributor, UK Distributor, Transfer Agent or asi.luxembourg@abrdn.com.

e) Equalisation on the subscription and redemption of shares

Equalisation is operated in connection with the subscription and redemption of shares. It represents the income element included in the price for the subscription and redemption of shares.

4. Expenses

a) Investment management fees

The Investment Managers receive fees for the provision and co-ordination of investment services to the Company, which shall not exceed 3% of the NAV of each sub-fund. The fees are calculated as a percentage of the NAV of each sub-fund.

For the purpose of the calculation, the value of each sub-fund (and the value attributable to each share class) is taken as at the NAV per share on the previous dealing day, taking into account any subscriptions and/or redemptions on that day.

These fees are accrued daily and are paid monthly in arrears to the Investment Managers. abrdn Investments Limited pays the fees of the Sub-Investment Managers. For certain classes of shares, the Investment Managers reserve the right, at their discretion, to reallocate any investment management fee they receive to certain recognised financial intermediaries or institutions in compliance with applicable laws and regulations.

Where a sub-fund invests in an open-ended collective investment scheme which is operated or managed by the Investment Manager or an associate of the Investment Manager, no additional annual management charge is incurred by the sub-fund on such an investment.

Notes to the Financial Statements (continued)

4. Expenses (continued)

a) Investment management fees (continued)

The following investment management fees rates were applicable during the year and as at 31 December 2023:

¹ The investment management fee for the class B decreased from 0.65 to 0.60, effective 1 November 2023.

² The investment management fee for the class B decreased from 0.70 to 0.65, effective 1 November 2023.

³ The investment management fee for the class B decreased from 0.95 to 0.90, effective 1 November 2023.

⁴ The investment management fee for the class B decreased from 0.75 to 0.70, effective 1 November 2023.

⁵ The investment management fee for the class B decreased from 0.55 to 0.50, effective 1 November 2023.

⁶ The investment management fee for the class B decreased from 0.45 to 0.40, effective 1 November 2023.

b) Management Company charge

The Company pays an annual charge to the Management Company up to a maximum of 0.05% of the NAV of each sub-fund.

For the purpose of the calculation, the value of each sub-fund (and the value attributable to each share class) is taken as at the NAV per share on the previous dealing day, taking into account any subscriptions and/or redemptions on that day.

The Management Company charge shall be accrued daily and payable monthly in arrears. The current Management Company charge is an annual rate of 2.5 basis points (0.025%).

The Management Company charge shall be used to pay the Management Company for the services it provides to the Company (in particular the performance of its monitoring role) and shall include reimbursement for any additional regulatory capital costs incurred by the Management Company by reason of its appointment per annum.

c) Transaction Costs

Transaction costs may arise on the acquisition and disposal of investments and these costs may include fees and commissions paid to agents, advisors, brokers, and dealers. These are included in "Net realised appreciation/ (depreciation) on Investments" in the Statement of Operations and Changes in Net Assets.

Dealing commission is usually paid for transactions in securities and derivatives over an exchange (e.g., equities). Transaction costs may not be separately identifiable for transactions that do not occur over an exchange as the costs may be included in the transaction price (e.g., bonds and money market instruments).

For the year ended 31 December 2023, the sub-funds incurred commission expenses relating to the sale and purchase of Future contracts which have been included in the Statement of Operations and Changes in Net Assets as "Net realised appreciation/(depreciation) on Future contracts". Similarly, during the year ended 31 December 2023, the sub-funds incurred commission expenses relating to the sale and purchase of option contracts which have been included in the

Notes to the Financial Statements (continued)

4. Expenses (continued)

c) Transaction Costs (continued)

Statement of Operations and Changes in Net Assets as "Net realised appreciation/(depreciation) on Option/swaption contracts".

During the year ended 31 December 2023, there were no transaction costs incurred relating to the trading of swaps.

For the year ended 31 December 2023, the sub-funds incurred transaction fees which have been defined as commissions and tax relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets as follows:

Sub-fund	Currency	Commissions '000	Taxes '000	Total '000
Absolute Return Global Bond Strategies Fund	GBP	360	-	360
China Equities Fund	USD	70	111	181

d) General administration charges ("GAC")

A general administration charge ("GAC") rate of 0.07% came into effect from 30 January 2023.

The operating expenses incurred by the Company are generally paid out of the assets of the relevant sub-fund. To seek to minimise the variability of these expenses, for a number of these operating expenses, a fixed rate charge of up to a maximum of 0.10% is charged to each share class (the GAC).

The level of the effective GAC below this maximum level may vary at the Board of Directors' discretion, as agreed with the Management Company, and different rates may apply across the sub-funds and share classes. The Board of Directors may amend the maximum fixed level of the GAC applicable to each share class at any time at its discretion upon prior notice to the relevant shareholders.

The effective GAC is calculated in the same way as the investment management fee set out in 4.a) above.

The effective GAC is disclosed as part of the other operating charges of a share class in the relevant PRIIP KID and in the interim and annual reports of the Company.

Full details of the GAC and the expenses that are included within the charges, can be found within the prospectus of the Company.

e) Expense cap

As at 31 December 2023 the maximum expense caps on the applicable share classes are listed below.

Prior to 1 February 2023 the expense caps were 0.20% for majority of the sub-funds except for Total Return Credit Fund and Global Focused Equity Fund with a cap of 0.10%, Responsible Global Asset Strategies Fund with a cap of 0.08% and Dynamic Multi Asset Income Fund with a cap of 0.15%.

The expense caps are applicable until such time as the Board of Directors changes the expense caps, any changes resulting in an increase in expenses will be communicated to the shareholders as required by applicable legislation.

Notes to the Financial Statements (continued)

4. Expenses (continued)

e) Expense cap (continued)

Amounts receivable resulting from the application of expense caps for the year will be paid annually by the Investment Manager.

Sub-fund	Share classes %								
	Class A	Class B	Class C	Class D	Class J	Class K	Class S	Class T	Class Z
Absolute Return Global Bond Strategies Fund	1.39	0.79	-	0.70	-	-	-	-	0.10
Euro Corporate Bond Fund	1.11	0.56	0.91	0.57	0.34	0.25	-	0.34	0.07

Responsible Global Asset Strategies Fund	1.50	0.90	-	0.81	0.75	0.71	-	-	0.11

f) Depositary fees

The depositary fees are calculated at a rate determined by the territory or country in which the sub-fund assets are invested. Currently, the lowest rate is 0.0025% and the highest rate is 0.50% of the NAV of the relevant sub-fund annually.

g) Bank interest

Bank interest expenses arise if there are negative interest rates on deposits and also owing to overdrafts that may arise from time to time.

5. Dividend distribution

The Directors declared monthly dividends for the sub-funds as listed below, for the year ended 31 December 2023, to all shareholders on record on the last day of the relevant month.

¹This dividend was declared on 1 January 2024 and recorded in that day's NAV, in line with the provisions of the prospectus.

6. Taxation

a) Taxe d'abonnement

Under legislation and regulations prevailing in Luxembourg, the sub-funds are subject to the "taxe d'abonnement" (subscription tax) at the rate of 0.05% per annum, except for the share classes which benefit from a reduced tax rate of 0.01% being the classes of shares dedicated to institutional investors. The tax is payable quarterly on the basis of the value of the net assets of the sub-funds at the end of the relevant calendar quarter. For sub-funds with investment in funds already subject to taxe d'abonnement there are exemptions available. For more information, please refer to the prospectus.

b) Withholding Tax Reclaims

Where possible, withholding tax reclaims have been filed in respect of the withholding tax applied on dividends and interests on bonds received during recent years. Receivables with respect to the potential refunded amounts are only booked when they are virtually certain.

c) Provision for foreign taxes

Capital gains, dividends and interest on securities received from other countries may be subject to withholding or capital gains taxes imposed by such countries. It is the Company's policy to provide for any material liability to foreign capital gains and income taxes.

7. Soft Commission/Commission Sharing

The Investment Manager did not enter into any soft commission/commission sharing arrangements with brokers during the financial year in relation to the Company. Neither the Investment Manager nor any of its connected persons have, or are entitled to, retain any cash rebates from any broker or dealer in consideration of directing transactions on behalf of the sub-funds to that broker or dealer. In any such cases rebates received shall be held for the accounts of the relevant sub-funds.

8. Directors' Interests and Remuneration

None of the Directors were materially interested in any contracts of significance subsisting with the Company either during the year or at 31 December 2023.

The collective remuneration of the Board of Directors charged to the Company amounts to EUR 138,027.68 for the year ended 31 December 2023.

9. Transactions with Connected Persons

a) Cross Trades

Transactions with connected parties during the year were entered into in the ordinary course of business and on normal commercial terms between the sub-funds and the Management Company, Investment Manager, Investment Adviser, and any entity in which those parties or their connected persons (as defined in the Code on Unit Trusts and Mutual Funds

Notes to the Financial Statements (continued)

9. Transactions with Connected Persons (continued)

a) Cross Trades (continued)

issued by the Securities and Futures Commission of Hong Kong) have a material interest. To the best of the Management Company's knowledge, the sub-funds' portfolios do not have any other transactions with connected persons except for those disclosed below:

^A There were no commissions paid to Citigroup broker entities for the period from 1 January 2023 to 31 December 2023.

b) Connected Transactions

During the year the Investment Manager undertook certain sale and purchase transactions which were enacted through broker entities forming part of the same group of companies as the Depositary, Citibank, and the details of these are included in the table above. Such transactions were carried out on an arm's length basis at current market value and market rates, and consistent with and the best interests of the Company. To the best of the Investment Manager's knowledge as at the date of preparing this annual report, there are no transactions between the sub-funds' portfolios and the Management Company, the Investment Manager or any of their connected persons as principal.

c) Related Party Transactions

Transactions with connected persons outlined in the Expenses Note 4 have been entered into in the ordinary course of business and on normal commercial terms. At the reporting date, the Management Company, abrdn Investments Luxembourg S.A. was a subsidiary of abrdn plc.

Notes to the Financial Statements (continued)

9. Transactions with Connected Persons (continued)

c) Related Party Transactions (continued)

As at 31 December 2023 other Funds/Trusts and mandates managed by abrdn plc held investments in the Company valued at USD 6,618,262,945.17.

10. Collateral

The Company paid/received cash collateral from the counterparties to the OTC financial derivative instruments in order to reduce the counterparty exposure, as detailed below:

4. Ukraine conflict

The military offensive from Russia against Ukraine since February 2022 continues to pose widespread sanctions on Russian assets. Geopolitical events can adversely affect assets of funds and performance thereon. To ensure the fair treatment of investors, abrdn's Investor Protection Committee (IPC) undertakes regular reviews of market liquidity across each asset class and fund, making appropriate adjustments where necessary.

abrdn's Valuation and Pricing Committee (VPC) also continue to review the valuation of assets and the recoverability of income from those assets, making appropriate adjustments where necessary. The VPC is made up of a wide range of specialists across abrdn with a wide range of experience in asset pricing.

As at 31 December 2023, the securities issued by Russian companies are valued at 'nil' in the portfolio statements of the respective sub-funds exposed to such securities. This nil value may not reflect the intrinsic value of those companies but rather reflect the fact that those securities are not tradable as of 31 December 2023.

5. Director changes

Mr Christopher Little resigned as chairperson of the Board of Directors and as a Director, effective 2 March 2023.

Ms Susanne van Dootingh was appointed as chairperson of the Board of Directors, effective 2 March 2023.

Notes to the Financial Statements (continued)

11. Significant events during the reporting year (continued)

5. Director changes (continued)

Mr Hugh Young resigned as a Director of the Board of Directors, effective 13 December 2023.

6. Prospectus changes

New prospectuses were issued on 30 January 2023, 17 April 2023 and 15 December 2023.

7. Depositary and Administrator changes

Effective 30 January 2023 the Company changed Depositary and Administrator from Bank of New York Mellon SA/NV, Luxembourg Branch to Citibank Europe plc, Luxembourg Branch.

8. KIID changes

Between April 2023 and October 2023, the Key Investor Information Document (KIID) for the Euro Corporate Bond and for the China Equities Fund included the incorrect Synthetic Risk and Reward Rating (SRRI) in the Risk and Reward Profile section.

This was a disclosure error only, it did not impact on either the Fund's performance. The incorrect information identified is detailed below and the updated KIIDs can be found at www.abrdn.com/en-lu

Incorrect SRRI detailed in the Risk and Reward Profile Section of the KIID:

Risk Rating 4 for the Euro Corporate Bond and 6 for the China Equities Fund

Corrected with the following wording:

Risk Rating 5 for the Euro Corporate Bond and 7 for the China Equities Fund

12. Subsequent events

Mr Xavier Meyer was appointed as a Director of the Board of Directors, effective 1 February 2024.

There are no other subsequent events to be reported after the year ended 31 December 2023.

13. SFDR Disclosure

Information on the environmental/social characteristics for sub-funds disclosing under Article 8 of SFDR, or information on sustainable investments for sub-funds disclosing under Article 9 of SFDR, respectively, is made available in the annex to the annual report from pages 158 to 248, as part of Appendix 4 which is unaudited.

General Information

Further information on abrdn SICAV II can be obtained from:

abrdn Investments Luxembourg S.A.

35a, avenue John F. Kennedy
L-1855 Luxembourg
Grand Duchy of Luxembourg

You can find further information about the Company, all available funds within the Company and share classes at www.abrdn.com. The prospectus, the PRIIPS KIDs, the articles of association, the audited annual report and the unaudited interim report of abrdn SICAV II may be obtained free of charge and in paper form from the Transfer Agent or the local paying agents, representatives and information agents. Please refer to the prospectus for the contact address of the addresses of the local paying agents, representatives and information agents.

For investors located in EU/EEA countries, and where the Company is registered for distribution, and unless otherwise specified, facilities according to Article 92(1)(a) of the EU Directive 2009/65/EC (as amended by Directive 2019/1160) are available from the Transfer Agent.

The following facilities according to Article 92(1)(b) to (e) of the EU Directive 2009/65/EC (as amended by Directive 2019/1160) are available at www.eifs.lu/abrdn.

1. Information on how orders (subscription, repurchase and redemption) can be made and how repurchase/redemption proceeds are paid;
2. Information and access to procedures and arrangements relating to investors' rights and complaints handling;
3. The latest prospectus, the articles of association, the annual and semi-annual reports, net asset value as well as the key information documents.

Subscription and Redemption of Shares

Applications for subscription, redemption and conversion of Shares should be sent to the Transfer Agent.

Furthermore, any additional information which is available at the registered office of the Company will also be available at the Transfer Agent.

Share Price Publication

Subscription prices and redemption prices are available at www.abrdn.com and are also available at the offices of the Transfer Agent.

Taxation

Tax regulations and the practices of financial authorities are constantly subject to change. Because of the complexity of tax laws in different jurisdictions, it is recommended that investors contact a tax adviser regarding the effect on their individual tax situation.

Additional Information for investors in Germany

For the following sub-funds of the Company, no notification for marketing in the Federal Republic of Germany has been filed with the Federal Financial Supervisory Authority (BaFin), so that Shares of this sub-fund may not be marketed to investors within the jurisdiction of the Investment Code (KAGB):

- Euro Government All Stocks Fund
- Multi Asset Climate Opportunities Fund

It is possible to view the prospectus, the PRIIPS KIDs, the Articles of Incorporation of the Company as well as the annual and semi-annual reports at the Transfer Agent.

Furthermore, subscription, redemption and conversion prices of the shares and any notices to the shareholders and any additional information which is also available at the registered office of the Company will be available at the Transfer Agent.

Share Price Publication

Subscription, redemption and conversion prices of the shares will also be available at www.abrdn.com and at the offices of the Transfer Agent. Any notices to the shareholders will be published in on www.abrdn.com.

In addition, communications to investors in the Federal Republic of Germany will be sent by mail in the following cases:

- suspension of the redemption of shares,

General Information (continued)

Additional Information for investors in Germany (continued)

- termination of the management of the Sub-fund or its liquidation,
- any amendments to the sub-fund rules which are inconsistent with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the sub-fund with one or more other sub-funds, and
- the change of the Company into a feeder fund or the modification of a master fund.

Additional Information for investors in Switzerland

1. Representative

The representative in Switzerland is BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, 8002 Zurich, Switzerland.

2. Paying agent

The paying agent in Switzerland is BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, 8002 Zurich, Switzerland.

3. Place where the relevant documents may be obtained

The constitution documents, prospectus, PRIIP KID's, articles of association, the annual and interim reports and a schedule of purchases and sales for the sub-funds can be obtained free of charge from the representative's Zurich Branch.

4. Publications

Publications in respect of abrdn SICAV II are published on the electronic platform of fundinfo AG Zurich (www.fundinfo.com). The subscription and redemption prices or the NAV with indication of "excluding commissions" are published on a daily basis on www.fundinfo.com.

5. Payment of retrocessions and rebates

In connection with distribution in Switzerland, abrdn Investments Luxembourg S.A. or its affiliates may pay retrocessions in order to cover the distribution and procurement activities of shares. These activities include but are not limited to the organisation of road shows, the attendance of events and fairs, the production of marketing material and the training of distribution collaborators. The recipients of the retrocessions must ensure transparent disclosure and inform investors, unsolicited and free of charge, about the amount of remuneration they may receive for distribution. On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the sub-funds of the investors concerned. Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors. Rebates may also be paid directly to the investors in order to reduce the fees and cost attributed to the sub-fund, as long as they:

- are paid from fees which have been charged to the assets of the sub-fund and not in addition;
- are paid on the basis of objective criteria;
- are paid to all investors fulfilling the objective criteria in the same amount and at the same time.

Rebates can only be paid if the following preconditions are fulfilled:

- The minimum investment in a collective investment scheme or in a range of collective investment schemes;
- The amount of fees resulting from the investment;
- The expected duration of the investment;
- The readiness of the investor to support the launch of the sub-fund.

At the request of the relevant investor receiving such rebate, abrdn Investments Luxembourg S.A. or its affiliates must disclose the amount free of charge.

6. Place of performance and jurisdiction

The place of performance and jurisdiction for the shares distributed in or from Switzerland is at the registered office of the representative.

Appendix 1: Risk Management (Unaudited)

The market risk measurement and monitoring of the sub-funds is carried out using either the Commitment approach or the Value at Risk (VaR) approach.

Sub-funds which do not make significant use of financial derivative instruments and/or limit their use of financial derivative instruments to efficient portfolio management or hedging strategies are monitored using the Commitment approach.

Sub-funds which utilise financial derivative instruments for efficient portfolio management purposes and/or for investment purposes in pursuing their investment objective (in addition to those used for hedging purposes) are monitored using either the relative or absolute VaR approach.

Risk Type

The Management Company uses the Commitment approach and the VaR approach for the abrdn SICAV II sub-funds as detailed below.

Commitment approach

The Commitment approach is based on the positions of financial derivative instruments, converted into their corresponding underlying equivalents as per ESMA Guidelines 10-788 – BOX 2.

Netting and hedging might be considered for financial derivatives and their underlying assets. The sum of these underlying equivalents must not exceed the NAV of the sub-fund.

The global risk on derivatives has been determined according to the commitment approach during the reporting year.

Japanese Equities Fund[†]

Value at Risk (VaR) approach

In accordance with CSSF Circular 11/512, the regulatory VaR limit associated with a sub-fund's total portfolio positions must not exceed two times (i.e. 200%) the VaR of its assigned Risk Benchmark for sub-funds under Relative VaR approach or 20% VaR (99% confidence level, 20-day holding period) for sub-funds monitored under the absolute VaR approach.

The VaR model used is a MonteCarlo Simulation model with historical observation period of risk factors of 3 years.

The tables below show the sub-funds under VaR approach and relative VaR approach and the related Risk Benchmark for each sub-fund.

Global Short Dated Corporate Bond Fund	96.00	106.80	102.10

Leverage

For sub-funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company also determines the sum of the nominal values or equivalent values of all the relevant derivatives and estimates in this regard a degree of the expected average value (leverage).

The expected levels of leverage indicated below reflect the use of all derivative instruments within the portfolio of a given sub-fund. An expected level of leverage does not necessarily represent an increase of risk in the sub-fund as some of the financial derivative instruments used may even reduce the risk. Shareholders should note that the "Sum of Notionals" approach of the expected level of leverage does not make a distinction as to the intended use of a derivative e.g., being either hedging or investment purposes.

The "Sum of Notionals" calculation typically results in a higher leverage figure than for the commitment approach calculation predominantly due to the exclusion of any netting and/or hedging arrangements.

The average leverage figures below have been compiled based on the daily figures from the period 2 January 2023 to 29 December 2023.

Sub-fund	Global Exposure	Average Leverage Sum of Notional
		%
Absolute Return Global Bond Strategies Fund	Absolute VaR	265.00
Emerging Market Government Bond Fund ¹	Relative VaR	109.00
Emerging Market Local Currency Debt Fund ¹	Relative VaR	30.00
Euro Corporate Bond Fund	Relative VaR	40.00
Euro Corporate Sustainable Bond Fund	Relative VaR	14.00
Euro Government All Stocks Fund	Relative VaR	8.00
Global Absolute Return Strategies Fund ¹	Absolute VaR	709.00
Global Corporate Bond Fund	Relative VaR	148.00
Global High Yield Bond Fund	Relative VaR	126.00
Global Inflation-Linked Government Bond Fund	Relative VaR	145.00
Global Risk Mitigation Fund	Absolute VaR	1,273.00
Global Short Dated Corporate Bond Fund	Relative VaR	149.00
Multi-Asset Climate Opportunities Fund	Absolute VaR	156.00
Responsible Global Asset Strategies Fund ¹	Absolute VaR	668.00
Total Return Credit Fund	Absolute VaR	199.00

¹ See note 11.

Appendix 2: Securities Financing Transactions (Unaudited)

Securities Financing Transaction Regulation ("SFTR") introduces reporting requirements for securities financing transactions ("SFTs") and total return swaps in the framework of transparency of securities financing transactions and of reuse.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- repurchase/reverse repurchase agreement;
- securities or commodities lending and securities or commodities borrowing;
- buy-sell back transaction or sell-buy transaction;
- margin lending transaction.

As at 31 December 2023, the following sub-fund held total return swaps as a type of instrument under the scope of the SFTR:

- Global Risk Mitigation Fund.

The sub-funds did not enter into securities lending, repos/reverse repos, buy/sell back transactions during the year ended 31 December 2023.

Global Risk Mitigation Fund

The net unrealised depreciation of total return swaps held by Global Risk Mitigation Fund as a proportion of the sub-fund's NAV as at 31 December 2023 was (1.56)%.

All the counterparties to the total return swaps have been disclosed in the table below:

Counterparty	Counterparty's country of incorporation	Local Currency	Total Return Swaps	
			Local Currency '000	Total Return Swaps USD '000
BNP Paribas	France	USD	141,502	141,502

The following tables provide an analysis of the maturity tenor of open OTC derivative transactions (including total return swaps) and associated collateral (provided)/received by the sub-fund, as at the statement of net assets date:

Maturity tenor	Local Currency	Total Return Swaps (net exposure)	
		Local Currency '000	USD '000
1 day	USD	-	-
2 to 7 days	USD	-	-
Open (> 7 days)	USD	141,502	141,502
Total		141,502	141,502

The above maturity tenor analysis has been based on the contractual maturity date of the relevant OTC derivative transaction (total return swaps).

Maturity tenor	Non-cash collateral (net exposure)		Cash collateral (net exposure)	
	USD '000		USD '000	
1 day	-	-	-	-
2 to 7 days	-	-	-	-
Open (> 7 days)	-	-	210	-
Total	-	-	210	-

The above maturity tenor analysis of cash and non-cash collateral is based the contractual maturity date of the security received/(provided) by the sub-fund as collateral.

There were no issuers of non-cash collateral as at 31 December 2023 for this sub-fund.

Appendix 2: Securities Financing Transactions (Unaudited) (continued)

Global Risk Mitigation Fund (continued)

The table below discloses the cash collateral (provided)/received by the sub-fund in relation to OTC derivative contracts (including total return swaps) held as at statement of net assets date.

Counterparty	Local currency	Local cash collateral (provided)/received by the sub-fund '000	Base currency	Base cash collateral (provided)/received by the sub-fund '000	Collateral expressed as a percentage of total net assets %
BNP Paribas	USD	(210)	USD	(210)	(0.15)

As at the statement of net assets date, all of the cash collateral received by the sub-fund in respect of OTC derivative transactions (including total return swaps) is either held on deposit with The Bank of New York Mellon SA/NV or re-invested in the Aberdeen Liquidity Fund (Lux), a money market fund.

The following table provides a currency analysis of the cash and non-cash collateral (provided)/received by the sub-fund, in respect of OTC derivative transactions (including total return swaps) as at the statement of net assets date.

Currency	Cash collateral received by the sub-fund USD '000	Cash collateral provided by the sub-fund USD '000	Non-cash collateral received by the sub-fund USD '000	Non-cash collateral provided by the sub-fund USD '000
USD	-	210	-	-
Total	-	210	-	-

There was no income earned/(paid) by the sub-fund from the reinvestment of cash collateral in money market funds for the year ended 31 December 2023.

There was no interest receivable/(payable) on cash collateral by the sub-fund as at 31 December 2023.

Investment grade is the type and quality of non-cash collateral (provided)/received by the sub-funds in respect of OTC derivative transactions (including total return swaps), as at the statement of net assets date.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency, Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no more than five equities combined represent more than 60% of the total index.

Appendix 3: Remuneration Policy (Unaudited)

Alternative Investment Fund Managers Directive (UCITS V)

Remuneration Disclosure UCITS V Annual Report and Accounts

Remuneration Policy

The abrdn plc Remuneration Policy applies with effect from 1 January 2023. The purpose of the abrdn plc Remuneration Policy (the "Policy") is to document clearly the remuneration policies, practices and procedures of abrdn as approved by the abrdn plc Remuneration Committee (the "Committee"). The Policy is available on request.

The Policy applies to employees of the abrdn group of companies ("Group" or "abrdn"), including UCITS V Management Companies ("ManCos") and the UCITS V funds that the ManCo manages.

Remuneration Principles

abrdn applies Group wide principles for remuneration policies, procedures and practices ensuring that:

- Remuneration within the Group is simple, transparent and fair.
- Our Policy supports our long-term strategy by reinforcing a performance-driven culture. It aligns the interests of our employees, shareholders and, importantly, our clients/customers.
- Our remuneration structure is flexible to accommodate the different challenges and priorities across all businesses and functions as appropriate.
- Remuneration policies, procedures and practices promote good conduct, including sound and effective risk management and do not encourage risk taking that exceeds the level of tolerated risk appetite.
- Remuneration extends beyond the provision of fixed and variable pay, with a focus on the retirement provision and the wellbeing needs of our employees, as part of our remuneration philosophy.

Total remuneration delivered is affordable for the Group.

Remuneration Framework

Employee remuneration is composed principally of fixed and variable elements of reward as follows:

- a) Fixed remuneration (salary and cash allowances, where appropriate) and Benefits (including pension).
- b) Variable remuneration (bonus, a proportion of which may be subject to retention or deferral depending on role and regulatory requirements; senior employees may also be awarded a long-term incentive award).

Appropriate ratios of fixed: variable remuneration will be set to as to ensure that:

- a) Fixed and variable components of total remuneration are appropriately balanced and
- b) The fixed component is a sufficiently high proportion of total remuneration to allow abrdn to operate a fully flexible policy on variable remuneration components, including having the ability to award no variable remuneration component in certain circumstances where either individual and/or Group performance does not support such an award.

Base salary	Base salary provides a core reward for undertaking the role and depending on the role, geographical or business market variances or other indicators, additional fixed cash allowances may make up a portion of fixed remuneration. Periodic reviews take into account the employee's role, scope of responsibilities, skills and experience, salary benchmarks (where available) and, where relevant, any local legislative or regulatory requirements.
Benefits (including retirement benefit where appropriate)	Benefits are made up of core benefits which are provided to all employees; and extra voluntary benefits that may be chosen by certain employees which may require contribution through salary sacrifice or other arrangements. Retirement benefits are managed in line with the relevant legislative requirements and governance structures. In certain, very limited circumstances, a cash allowance may be offered in lieu of a retirement arrangement.

Appendix 3: Remuneration Policy (Unaudited)

Annual Awards	Performance	Bonus	<p>Employees who have been employed during a performance year (1 January to 31 December) may be eligible to be considered for an annual bonus in respect of that year.</p> <p>Annual bonuses are based upon Group, Business/Function, Team and Individual performance (with individual performance assessed against agreed goals and behaviours). The variable remuneration pool for all eligible employees, including Identified Staff or Material Risk Takers ("MRTs"), is determined initially by reference to profitability and other quantitative and qualitative financial and non-financial factors including risk considerations (on an ex-post and ex-ante basis). In reaching its final funding decision, the Committee exercises its judgement to ensure that the outcome reflects holistic Company performance considerations.</p> <p>abrdrn Investments Luxembourg S.A. has specific obligations to act in the best interests of the UCITS V funds it manages and its investors. Accordingly, the performance of the underlying funds and the interests of investors (including, where relevant, investment risk) are also taken into account as appropriate. The Risk and Capital Committee and the Audit Committee formally advise the Committee as part of this process.</p> <p>The overall bonus pool is allocated to businesses and functions based on absolute and relative performance of each business and function and their alignment with strategic priorities and risk considerations. Allocation by region and subdivision/team is determined on a discretionary basis by the business/function and regional heads based on the absolute and relative performance of the constituent teams and alignment with strategic priorities.</p> <p>Individual annual bonus awards are determined at the end of the 12-month performance period with performance assessed against financial and non-financial individual objectives, including behaviour and conduct. Individual awards for Identified Staff are reviewed and approved by the Committee (with some individual award approvals delegated, as appropriate, to the Group's Compensation Committee, over which the Committee retains oversight). In carrying out these approvals, the Committee seeks to ensure that outcomes are fair in the context of overall Group performance measures and adjusted, where appropriate, to reflect input from the Risk and Capital Committee and the Audit Committee. Variable remuneration awards are subject to deferral for a period of up to three years. A retention period may also be applied as required by the relevant regulatory requirements. Deferral rates and periods comply, at a minimum, with regulatory requirements. In addition to the application of ex-ante adjustments described above, variable remuneration is subject to ex-post adjustment (malus / clawback arrangements).</p>
---------------	-------------	-------	---

Appendix 3: Remuneration Policy (Unaudited)

Other elements of remuneration – selected employees	<p>The following remuneration arrangements may be awarded in certain very limited circumstances:</p> <p>Carried Interest Plans – These arrangements are designed to reward performance in roles where a carried interest plan is appropriate. Selected employees are granted carried interest shares in private market funds established by the Group.</p> <p>Buy-Out Awards/Guaranteed Bonuses – These are intended to facilitate/support the recruitment of new employees. Buy-outs are not awarded, paid or provided unless they are in the context of hiring new employees. Guaranteed bonuses are not awarded, paid or provided unless they are exceptional and in the context of hiring new employees and limited to the first year of service. These awards are only made where such a payment or award is permitted under any relevant remuneration regulations and are designed to compensate for actual or expected remuneration foregone from previous employers by virtue of their recruitment.</p> <p>Retention and Special Performance Awards / LTIP – Supports retention and/or the delivery of specific performance outcomes and/or to incentivise senior employees to support the long-term, sustained performance of abrdn. The Company may determine that it is appropriate to grant such awards in limited circumstances. Awards are structured to deliver specific retention and/or performance outcomes. Retention and/or special performance awards comply with all relevant regulatory requirements.</p> <p>Severance Pay – Payment made to support an employee whose role is considered to be redundant. Severance payments comply with any legislative and regulatory requirements and any payments are inclusive of any statutory entitlement. In the event of severance, the treatment of any individual elements of an employee’s remuneration is governed, as appropriate, by relevant plan or scheme rules.</p>
---	--

Control Function

The Group ensures that, as appropriate, senior employees engaged in a control function are independent from the business units they oversee and have appropriate authority to undertake their roles and duties. These include, but are not necessarily limited to, Risk, Compliance and Internal Audit function roles. Senior employees engaged in a control function are remunerated in a way that ensures they are independent from the business areas they oversee, have appropriate authority and have their remuneration directly overseen by the Committee.

Conflicts of Interest

The Policy is designed to avoid conflicts of interest between the Group and its clients and is designed to adhere to local legislation, regulations or other provisions. In circumstances or jurisdictions where there is any conflict between the Policy and local legislation, regulations or other provisions, then the latter prevail. Where the Committee receives input from members of management on the remuneration arrangements in operation across the Group, this never relates to their own remuneration.

Personal Investment Strategies

The Company adheres to the regulatory principles and industry best practice on the use of personal hedging strategies which act in restricting the risk alignment embedded in employee remuneration arrangements.

UCITS V Identified Staff/MRTs

The 'Identified Staff' or MRTs of abrdn Investments Luxembourg S.A. are those employees who could have a material impact on the risk profile of abrdn Investments Luxembourg S.A. or the UCITS V funds it manages. This broadly includes senior management, decision makers and control functions. For the purposes of this disclosure, 'Identified Staff' includes employees of entities to which activities have been delegated.

Quantitative remuneration disclosure

The table below provides an overview of the following:

- Aggregate total remuneration paid by abrdn Investments Luxembourg S.A. to its entire staff; and
- Aggregate total remuneration paid by abrdn Investments Luxembourg S.A. to its UCITS V 'Identified Staff'.

Amounts shown reflect payments made during the financial reporting period in question. The reporting period runs from 1 January 2023 to 31 December 2023 inclusive.

Appendix 3: Remuneration Policy (Unaudited)

	Headcount	Total Remuneration GBP'000
abrln Investments Luxembourg S.A. staff¹	1,300	170,654
of which		
Fixed remuneration		139,925
Variable remuneration		30,729
abrln Investments Luxembourg S.A. 'Identified Staff'²	95	34,647
of which		
Senior Management ³	40	21,090
Other 'Identified Staff'	55	13,557

¹As there are a number of individuals indirectly and directly employed by abrln Investments Luxembourg S.A. this figure represents an apportioned amount of abrln's total remuneration fixed and variable pay, apportioned to the ManCo on an AUM basis. The Headcount figure provided reflects the number of beneficiaries calculated on a Full Time Equivalent basis

²The Identified Staff disclosure relates to UCITS V MRTs and represents total compensation of those staff of the ManCo who are fully or partly involved in the activities of the ManCo.

³Senior management are defined in this table as ManCo Directors and members of the abrln plc Board, together with its Executive Committee, Investment Management Committee.

Appendix 4: Sustainability Related Disclosures (Unaudited)

The EU Sustainable Finance Disclosure Regulation (SFDR) sets out in Articles 8 and 9 the sustainability-related reporting requirements, respectively for sub-funds that promote environmental or social characteristics and sub-funds that have sustainable investments as their objective. In addition, all financial products are required to disclose (see Company prospectus) their approach to integrating sustainability risks into the investment decision-making in line with Article 6 of the SFDR. The following table outlines the SFDR Article under which the sub-funds make sustainability-related reporting and, for each Article 8 and Article 9 sub-fund, an SFDR periodic disclosure report has been attached.

Sub-fund	SFDR Article (as at 31 December 2023)
Absolute Return Global Bond Strategies Fund	Article 6
Emerging Market Local Currency Debt Fund	Article 6
Euro Government All Stocks Fund	Article 6
Global Corporate Bond Fund	Article 6
Global High Yield Bond Fund	Article 6
Global Inflation-Linked Government Bond Fund	Article 6
Global Risk Mitigation Fund	Article 6
Euro Corporate Bond Fund	Article 8
Euro Corporate Sustainable Bond Fund	Article 8
European Smaller Companies Fund	Article 8
Global Short Dated Corporate Bond Fund	Article 8
Global Smaller Companies Fund	Article 8
Responsible Global Asset Strategies Fund (closed on 27 September 2023)	Article 8
Total Return Credit Fund	Article 8
Global Real Estate Securities Sustainable Fund	Article 8
Global Impact Equity Fund	Article 9
Multi-Asset Climate Opportunities Fund	Article 9

The above Article 6 sub-funds do not promote environmental or social characteristics and have no sustainable investment objectives. The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities. These sub-funds also do not consider principle adverse impacts.

The above Article 8 sub-funds promote environmental or social objectives. The "do no significant harm" principle applies only to those investments underlying the financial products that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

The above Article 9 sub-funds have sustainable investments as their objective.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Euro Corporate Bond Fund

Legal entity identifier 0C8VPGENNA8PSKOIU246

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.64% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To promote the environmental and social characteristics, the Fund applied ESG assessment criteria, ESG screening criteria and promoted good governance including social factors.

The portfolio is underpinned by our well-established active management approach of security selection tailored to the overall environment, which combines fundamental and environmental, social and governance (ESG) considerations into our individual name, sector and top-down portfolio construction decisions. An assessment of a company's sustainability is supported by proprietary company rating models and a deeply embedded ESG framework utilising on-desk Fixed Income and central ESG resources.

The Fund:

- Excluded companies with poor ESG business practices. This is achieved through a set of exclusions,

which identify controversial business activities and ESG laggards i.e. companies rated poorly based on their management of ESG risks within their business.

- Engaged with companies to gather a forward-looking insight into management of ESG risks, opportunities and actively influence the management of these factors in line with best practice standards.
- Targeted a lower carbon intensity than the benchmark.

The Fund seeks to:

- Generate consistent risk-adjusted outperformance using our active management approach of stock selection tailored to the overall environment.
- Benefit from our active engagement with companies, where we encourage positive changes in corporate behaviour.
- Construct a portfolio that invests in companies with strong Environmental, Social and Governance practices.
- Leverage the support and insights of our large, dedicated Fixed Income team and embedded ESG specialists' resources.

We also applied an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. The key areas of focus are the materiality of the inherent Environmental and Social risks of the sector of operation (e.g. extraction, water usage, cyber security) and how specific companies manage these risks, combined with the quality and sustainability of their corporate governance. This materiality assessment is combined with a judgement on the timeframe over which these ESG risks may have an impact. Our analysts utilise an ESG Risk Rating Framework to support making these assessments. This is a proprietary tool designed to help focus the knowledge and expertise of credit analysts in a systematic way to substantiate the overall ESG Risk Rating (Low/Medium/High) assigned to debt issuers.

Additionally, our proprietary ESG House Score, developed by our central ESG investment team in collaboration with the Quantitative investment team, was used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. This allows us to see how companies rank in a global context.

To complement this, we also utilised our active stewardship and engagement activities.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There is 1 high risk issuer held in the fund, the issuer is not high risk due to governance issues. Therefore, since all pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment. We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 83.39%.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

N/A - No Previous report

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including:

(1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under “Fund Centre”.

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

Largest Investments	Sector	% Assets	Country
UBS GROUP AG 3.25% 04/02/2026	Financials	0.83	Switzerland
NATWEST GROUP PLC 1.75% 03/02/2026	Financials	0.82	United Kingdom
ELM FOR FIRMENICH INTERN 3.75%	Materials	0.80	Switzerland

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 80% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards were met by applying certain PAI's, where relevant, to these underlying assets. The Fund invested a maximum of 20% of assets in the "Other" category, which include cash, money market instruments and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 23%

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 14%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1% of assets in the “Other” category. The investments included under “other” are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund’s screening, scoring requirements and benchmark targets ensure that the portfolio is invested in companies that uphold appropriate ESG standards. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **How does the reference benchmark differ from a broad market index?**

Not applicable

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **Euro Corporate Sustainable Bond Fund**

Legal entity identifier **5493004ABG8CUCJM5548**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.91% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To promote the environmental and social characteristics, the Fund applied ESG assessment criteria, ESG screening criteria and promoted good governance including social factors.

The portfolio is underpinned by our well-established active management approach of security selection tailored to the overall environment, which combines fundamental and ESG considerations into our individual name, sector and top-down portfolio construction decisions. An assessment of a company's sustainability is supported by proprietary company rating models and a deeply embedded ESG framework utilising on-desk Fixed Income and central ESG resources.

The Fund:

- Targeted at least a 15% reduction of the benchmark investable universe by excluding companies identified as not having sustainable business practices. This was achieved through a set of exclusions,

which identify controversial business activities and ESG laggards i.e. companies rated poorly based on their management of ESG risks within their business.

- Engaged with companies to gather a forward-looking insight into management of ESG risks, opportunities and actively influence the management of these factors in line with best practice standards.
- Targeted an equal or better ESG score compared to the benchmark.
- Targeted a carbon intensity 10% lower than the benchmark.

The Fund seeks to:

- Generate consistent risk-adjusted outperformance using our active management approach of stock selection tailored to the overall environment.
- Benefit from our active engagement with companies, where we encourage positive changes in corporate behaviour.
- Construct a portfolio that invests in companies with strong Environmental, Social and Governance practices.
- Leverage the support and insights of our large, dedicated Fixed Income team and embedded ESG specialist resources.

We also applied an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. The key areas of focus are the materiality of the inherent Environmental and Social risks of the sector of operation (e.g. extraction, water usage, cyber security) and how specific companies manage these risks, combined with the quality and sustainability of their corporate governance. This materiality assessment is combined with a judgement on the timeframe over which these ESG risks may have an impact. Our analysts utilise an ESG Risk Rating Framework to support making these assessments. This is a proprietary tool designed to help focus the knowledge and expertise of credit analysts in a systematic way to substantiate the overall ESG Risk Rating (Low/Medium/High) assigned to debt issuers.

Additionally, our proprietary ESG House Score, developed by our central ESG investment team in collaboration with the Quantitative investment team, was used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. This allowed us to see how companies rank in a global context.

To complement this, we also utilised our active stewardship and engagement activities.

This Fund had a financial benchmark that was used for portfolio construction but does not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. In line with the fund exclusions, no ESG high risk issuers are held.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 10% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was in excess of 10% lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 88.34 %.

ESG Rating: Using our proprietary house score, we confirm that during the reporting period the Fund achieved an ESG rating higher than the benchmark. As at year-end, the fund's position weighted ESG score was 65, compared to the benchmark's score of 62. We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● ***...and compared to previous periods?***

ESG Assessment Criteria: At the end of the previous year, no ESG high risk issuers were held in the fund.

ESG screening criteria: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period.

During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 10% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 84.4%.

ESG Rating: Using our proprietary house score, during the previous reporting period the Fund achieved an ESG rating higher than the benchmark.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated

Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis

- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance

- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

Largest Investments	Sector	% Assets	Country
MORGAN STANLEY 0.406% 10/29/2027	Financials	1.17	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards were met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund committed to a minimum of 15% in Sustainable Investments. The Fund invested a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	0.40
Consumer Discretionary	Automobiles Manufacturing	1.65
Consumer Discretionary	Consumer Services	1.56

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are

expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

investee companies, e.g. for a transition to a green economy.
- operational expenditure (Opex) reflecting green operational activities of investee companies.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 28%

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 15%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 0% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund's screening, scoring requirements and benchmark targets ensure that the portfolio is invested in companies that uphold appropriate ESG standards. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **European Smaller Companies Fund**

Legal entity identifier **IKNRVTZFJMXVU04INT73**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.14% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To promote the environmental and social characteristics, the Fund applied ESG assessment criteria, ESG screening criteria and promoted good governance including social factors.

We used our proprietary research framework to analyse the foundations of each business to ensure proper context for our investments. This included the durability of its business model, the attractiveness of its industry, the strength of its financials and the sustainability of its economic moat.

We also considered the quality of its management team and analysed the environmental, social and governance (ESG) opportunities and risks impacting the business and appraised how well these are managed. We assigned a proprietary score to articulate the quality attributes of each company, one of which is the ESG Quality rating. This enabled the portfolio managers to exclude companies with material ESG risks and positively skew the portfolio towards ESG opportunities and to build well-diversified, risk-

adjusted portfolios.

Additionally, our proprietary ESG House Score, developed by our central ESG investment team in collaboration with the Quantitative investment team, was used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. This allowed us to see how companies rank in a global context.

To complement this, we also utilised our active stewardship and engagement activities.

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

We confirm the Fund only owned companies with an ESG Q score of 1-3. As at year-end, 1% of the fund had an ESG Q score of 1, 47% had an ESG Q score of 2 and 44% had an ESG Q score of 3.

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 42.45%.

We confirm that during the reporting period the fund's ESG rating from MSCI was A.

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score and Equities ESG Q score as above, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

At the end of the previous year, 6% of the fund had an ESG Q score of 1, 41% had an ESG Q score of 2 and 53% had an ESG Q score of 3.

During the previous reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period.

During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 36.07%.

As at year-end, the fund's ESG rating from MSCI was AA.

During the previous reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score and Equities ESG Q score as above, we avoided those companies with the worst governance practices.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex,

Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary

devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

Largest Investments	Sector	% Assets	Country
DIPLOMA PLC	Industrials	4.94	United Kingdom
AZIMUT HOLDING SPA	Financials	4.34	Italy
MORGAN SINDALL GROUP PLC	Industrials	4.21	United Kingdom
ADDTECH AB-B SHARES	Industrials	4.20	Sweden
CTS EVENTIM AG & CO KGAA	Consumer Discretionary	4.16	Germany
KOMAX HOLDING AG-REG	Industrials	3.87	Switzerland
GAZTRANSPORT ET TECHNIGA SA	Energy	3.49	France
GAMES WORKSHOP GROUP PLC	Consumer Discretionary	3.36	United Kingdom

GRAFTON GROUP PLC-UTS -CDI	Consumer Discretionary	3.30	United Kingdom
HILL & SMITH PLC	Industrials	3.11	United Kingdom
FINECOBANK SPA	Financials	3.10	Italy
BORREGAARD ASA	Materials	3.08	Norway
YOUGOV PLC	Communications	2.84	United Kingdom
INTERPARFUMS SA	Consumer Staples	2.82	France

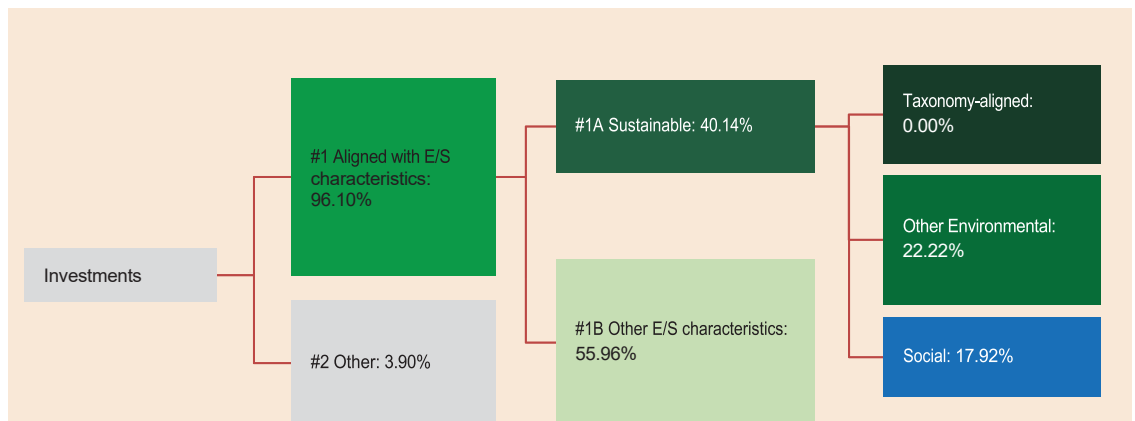

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards were met by applying certain PAI's, where relevant, to these underlying assets. The Fund invested a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	7.61
Consumer Discretionary	Consumer Discretionary Services	4.16
Consumer Discretionary	Retail & Whsle - Discretionary	6.19
Financials	Financial Services	9.58
Financials	Insurance	0.91
Financials	Banking	3.10
Industrials	Industrial Products	24.38
Industrials	Industrial Services	10.41
Materials	Materials	6.14
Health Care	Health Care	3.99
Technology	Software & Tech Services	6.09
Consumer Staples	Consumer Staple Products	4.64
Consumer Staples	Retail & Wholesale - Staples	1.14
Energy	Oil & Gas	3.49
Communications	Media	3.28
Utilities	Utilities	0.87

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (Opex) reflecting green operational activities

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

of investee companies.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 22%

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 18%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 4% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund's screening, scoring requirements and benchmark targets ensure that the portfolio is invested in companies that uphold appropriate ESG standards. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **Global Short Dated Corporate Bond Fund**

Legal entity identifier **213800K8ASDBMGKRJ250**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 29.70% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To promote the environmental and social characteristics, the Fund applied ESG assessment criteria, ESG screening criteria and promoted good governance including social factors.

The portfolio is underpinned by our well-established active management approach of security selection tailored to the overall environment, which combines fundamental and environmental, social and governance (ESG) considerations into our individual name, sector and top-down portfolio construction decisions. An assessment of a company's sustainability is supported by proprietary company rating models and a deeply embedded ESG framework utilising on-desk Fixed Income and central ESG resources.

The Fund:

- Excluded companies with poor ESG business practices. This is achieved through a set of exclusions,

which identify controversial business activities and ESG laggards i.e. companies rated poorly based on their management of ESG risks within their business.

- Engaged with companies to gather a forward-looking insight into management of ESG risks, opportunities and actively influence the management of these factors in line with best practice standards.
- Targeted a lower carbon intensity than the benchmark.

The Fund seeks to:

- Generate consistent risk-adjusted outperformance using our active management approach of stock selection tailored to the overall environment.
- Benefit from our active engagement with companies, where we encourage positive changes in corporate behaviour.
- Construct a portfolio that invests in companies with strong Environmental, Social and Governance practices.
- Leverage the support and insights of our large, dedicated Fixed Income team and embedded ESG specialists' resources.

We also applied an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. The key areas of focus are the materiality of the inherent Environmental and Social risks of the sector of operation (e.g. extraction, water usage, cyber security) and how specific companies manage these risks, combined with the quality and sustainability of their corporate governance. This materiality assessment is combined with a judgement on the timeframe over which these ESG risks may have an impact. Our analysts utilise an ESG Risk Rating Framework to support making these assessments. This is a proprietary tool designed to help focus the knowledge and expertise of credit analysts in a systematic way to substantiate the overall ESG Risk Rating (Low/Medium/High) assigned to debt issuers.

Additionally, our proprietary ESG House Score, developed by our central ESG investment team in collaboration with the Quantitative investment team, was used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. This allowed us to see how companies rank in a global context.

To complement this, we also utilised our active stewardship and engagement activities.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There is 1 high risk issuer held in the fund, the issuer is not high risk due to governance issues. Therefore, since all pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment. We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 77.66%.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

ESG Assessment Criteria: At the end of the previous year, 1 ESG high risk issuer was held in the fund.

ESG screening criteria: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period.

During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 99%

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to

controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdrn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdrn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdrn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

Largest Investments	Sector	% Assets	Country
JPMORGAN CHASE & CO 1.578% 04/22/2027	Financials	1.13	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards were met by applying certain PAI's, where relevant, to these underlying assets. The Fund invested a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (Opex) reflecting green operational activities

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

of investee companies.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 14%

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 16%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 3% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund's screening, scoring requirements and benchmark targets ensure that the portfolio is invested in companies that uphold appropriate ESG standards. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

Product name: **Global Smaller Companies Fund**

Legal entity identifier **2138009F7X5MEWACXF49**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.16% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To promote the environmental and social characteristics, the Fund applied ESG assessment criteria, ESG screening criteria and promoted good governance including social factors.

We used our proprietary research framework to analyse the foundations of each business to ensure proper context for our investments. This included the durability of its business model, the attractiveness of its industry, the strength of its financials and the sustainability of its economic moat.

We also considered the quality of its management team and analysed the environmental, social and governance (ESG) opportunities and risks impacting the business and appraised how well these are managed. We assigned a proprietary score to articulate the quality attributes of each company, one of which is the ESG Quality rating. This enabled the portfolio managers to exclude companies with material ESG risks and positively skew the portfolio towards ESG opportunities and to build well-diversified, risk-

adjusted portfolios.

Additionally, our proprietary ESG House Score, developed by our central ESG investment team in collaboration with the Quantitative investment team, was used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. This allowed us to see how companies rank in a global context.

To complement this, we also utilised our active stewardship and engagement activities.

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

We confirm the Fund only owned companies with an ESG Q score of 1-3. As at year-end, 12% of the fund had an ESG Q score of 1, 56% had an ESG Q score of 2 and 26% had an ESG Q score of 3.

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 17.14%

We confirm that during the reporting period the Fund achieved the at least the same ESG rating based on MSCI data with the benchmark. As at year-end, the fund's ESG rating from MSCI was A, compared to the benchmark's rating of A.

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdrn ESG House Score and Equities ESG Q score as above, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

At the end of the previous year, 13% of the fund had an ESG Q score of 1, 57% had an ESG Q score of 2 and 30% had an ESG Q score of 3.

During the previous reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period.

During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 19.91%.

As at year-end, the fund's ESG rating from MSCI was AA, compared to the benchmark's rating of A.

During the previous reporting period the Fund focused engagement and analysis on governance and that using the abrdrn ESG House Score and Equities ESG Q score as above, we avoided those companies with the worst governance practices.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdrn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In

addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for

multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis

- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance

- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
-- 31/12/2023

Largest Investments	Sector	% Assets	Country
ASICS CORP	Consumer Discretionary	3.76	Japan
AXON ENTERPRISE INC	Industrials	3.67	United States of America
LATTICE SEMICONDUCTOR CORP	Technology	3.66	United States of America
ALTAIR ENGINEERING INC - A	Technology	3.48	United States of America
STEADFAST GROUP LTD	Financials	3.34	Australia
FABRINET	Technology	3.30	Thailand
CTS EVENTIM AG & CO KGAA	Consumer Discretionary	3.11	Germany
SINBON ELECTRONICS CO LTD	Technology	3.06	Taiwan, Republic of China
SiteOne Landscape Supply Inc	Industrials	2.98	United States of America

KEYWORDS STUDIOS PLC	Technology	2.44	Ireland
CARLISLE COS INC	Materials	2.42	United States of America

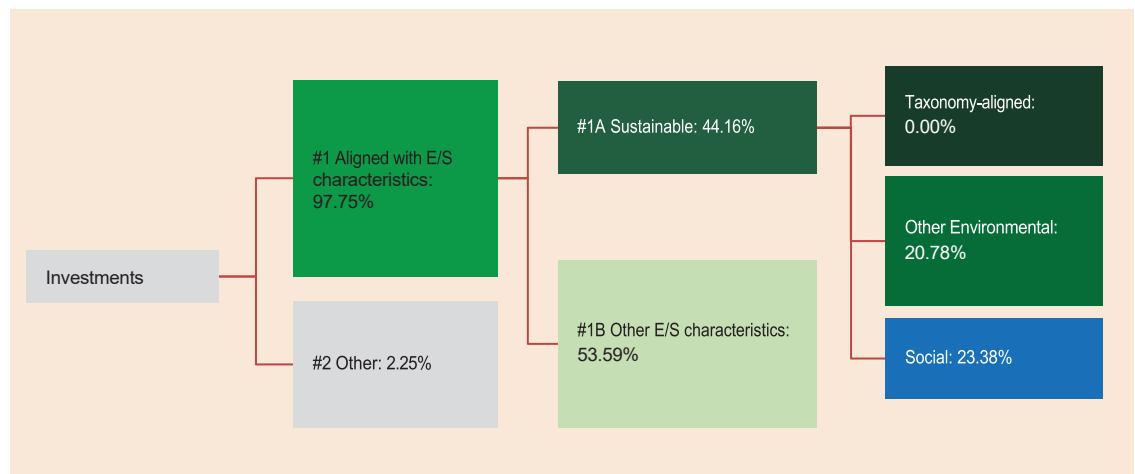

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards were met by applying certain PAI's, where relevant, to these underlying assets. The Fund invested a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	14.60
Consumer Discretionary	Consumer Discretionary Services	4.84
Consumer Discretionary	Retail & Whsle - Discretionary	2.15
Financials	Financial Services	2.17
Financials	Insurance	3.34
Financials	Banking	1.94
Industrials	Industrial Products	13.91
Industrials	Industrial Services	9.84
Materials	Materials	3.67
Health Care	Health Care	4.12
Technology	Software & Tech Services	11.33
Technology	Tech Hardware & Semiconductors	11.66
Consumer Staples	Consumer Staple Products	1.65
Consumer Staples	Retail & Wholesale - Staples	7.09
Energy	Oil & Gas	2.95

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 21%

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 23%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2% of assets in the “Other” category. The investments included under “other” are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund’s screening, scoring requirements and benchmark targets ensure that the portfolio is invested in companies that uphold appropriate ESG standards. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Product name: **Responsible Global Asset Strategies Fund**

Legal entity identifier **213800H44IXVBWSIJ774**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The fund has closed to all investors and holds no investments at the year end reporting date.

Prior to closure and during the reporting period, to promote the environmental and social characteristics, the Fund applied ESG screening criteria, excluded companies with the highest ESG risks as identified by abrdn's ESG House Score, and promoted good governance including social factors.

The Responsible Global Asset Strategies (RGAS) Fund typically consisted of 20 to 30 investment strategies that span markets and were the discretionary choice of our managers using our established Absolute Return philosophy and approach. In selecting and constructing positions for RGAS, alongside traditional analysis, we used a combination of ESG integration, screening and enhancement criteria to achieve the Fund's sustainable and financial objectives.

ESG integration incorporated an assessment of ESG factors into the investment analysis and decision

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

making across all holdings of the Fund. Exclusions via ESG screening criteria mean we avoided investing in activities that present particular risks. Our ESG enhancement criteria mean that the Fund holdings enhanced ESG characteristics. Combined, these three elements provided investors with a responsible approach to global asset investing.

The assessment of ESG factors was integrated into every stage of our multi-asset investment process, from research and implementation to asset allocation, risk management and stewardship.

Our Multi Asset Solutions team generated insights combining return-potential with sustainable investment themes. Asset allocation decisions and ESG were closely linked, as changes associated with ESG issues shaped our view of the optimal allocation of capital to generate risk-adjusted returns for clients. This can also create the opportunity to direct capital to where ESG challenges are particularly pressing, such as climate change.

When implementing each investment idea, we considered the characteristics of each security and consider the financial risks associated with ESG issues. This resulted in the exclusion of firms associated with certain activities.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

The fund has closed to all investors and holds no investments at the year end reporting date. Prior to closure the measures applied by the Fund were:

Countries:

For government bonds and instruments used to express interest rate and currency view, the Fund excluded any country in the bottom 25% based on the abrdn ESG Country Ranking. This index used Environmental, Social, Governance and Political factors (“ESGP Factors”) which are aligned with the UN Sustainable Development Goals (SDGs). The Emerging Market Government Bond allocation used similar criteria which focus on the indicators under the Governance and Political pillars.

Companies or Issuers:

abrdn sought to enhance the overall ESG characteristics of the direct investments in equity and credit by adjusting the holdings based on abrdn view of ESG risk. abrdn used the abrdn proprietary ESG House Score, developed by the central ESG investment team, to identify companies abrdn view as having high or poorly managed ESG risks. The score was calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. This allowed abrdn to see how companies rank in a global context. abrdn excluded companies with the highest ESG risks, as identified by the ESG House Score.

For our core global equity allocation, we targeted a 50% reduction in weighted average carbon intensity (measured by Trucost) compared to passive global equities. For each equity basket, we targeted a 10% reduction in carbon intensity relative to the MSCI ACWI Index or relevant sector benchmark where appropriate.

● ***...and compared to previous periods?***

The fund has closed to all investors and holds no investments at the year end reporting date.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The fund has closed to all investors and holds no investments at the year end reporting date. Prior to closure and during the reporting period the following objectives were applicable:

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific

activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has closed to all investors and holds no investments at the year end reporting date. Prior to closure and during the reporting, the Fund considered the following:

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

The fund committed to hold a minimum of 50% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards were met by applying certain PAI's, where relevant, to these underlying assets. The Fund invested a maximum of 50% of assets in the "Other" category, which include cash, money market instruments and derivatives.

The fund has closed to all investors and holds no investments at the year end reporting date.

● *In which economic sectors were the investments made?*

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has closed to all investors and holds no investments at the year end reporting date.

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

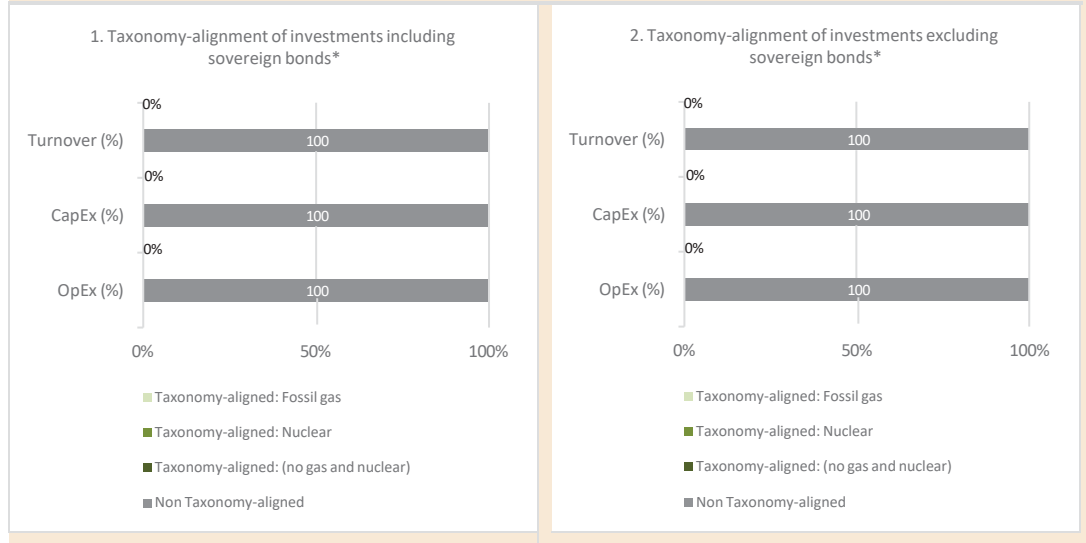

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund has closed to all investors and holds no investments at the year end reporting date.

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has closed to all investors and holds no investments at the year end reporting date.

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 0%

What was the share of socially sustainable investments?

The fund has closed to all investors and holds no investments at the year end reporting date.

The share of sustainable investments with a social objective is 0%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The fund has closed to all investors and holds no investments at the year end reporting date.

The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria, ESG screening criteria and promoted good governance including social factors. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How does the reference benchmark differ from a broad market index?*

Not applicable

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

● *How did this financial product perform compared with the reference benchmark?*

Not applicable

● *How did this financial product perform compared with the broad market index?*

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **Total Return Credit Fund**

Legal entity identifier **549300O80EVHVV2VU007**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.54% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To promote the environmental and social characteristics, the Fund applied ESG assessment criteria, ESG screening criteria and promoted good governance including social factors.

The portfolio is underpinned by our well-established active management approach of security selection tailored to the overall environment, which combines fundamental and environmental, social and governance (ESG) considerations into our individual name, sector and top-down portfolio construction decisions. An assessment of a company's sustainability is supported by proprietary company rating models and a deeply embedded ESG framework utilising on-desk Fixed Income and central ESG resources.

The Fund:

- Excluded companies with poor ESG business practices. This is achieved through a set of exclusions,

which identify controversial business activities and ESG laggards i.e. companies rated poorly based on their management of ESG risks within their business.

- Engaged with companies to gather a forward-looking insight into management of ESG risks, opportunities and actively influence the management of these factors in line with best practice standards.
- Targeted a lower carbon intensity than the benchmark.

The Fund seeks to:

- Generate consistent risk-adjusted outperformance using our active management approach of stock selection tailored to the overall environment.
- Benefit from our active engagement with companies, where we encourage positive changes in corporate behaviour.
- Construct a portfolio that invests in companies with strong Environmental, Social and Governance practices.
- Leverage the support and insights of our large, dedicated Fixed Income team and embedded ESG specialists' resources.

We also applied an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. The key areas of focus are the materiality of the inherent Environmental and Social risks of the sector of operation (e.g. extraction, water usage, cyber security) and how specific companies manage these risks, combined with the quality and sustainability of their corporate governance. This materiality assessment is combined with a judgement on the timeframe over which these ESG risks may have an impact. Our analysts utilise an ESG Risk Rating Framework to support making these assessments. This is a proprietary tool designed to help focus the knowledge and expertise of credit analysts in a systematic way to substantiate the overall ESG Risk Rating (Low/Medium/High) assigned to debt issuers.

Additionally, our proprietary ESG House Score, developed by our central ESG investment team in collaboration with the Quantitative investment team, was used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. This allows us to see how companies rank in a global context.

To complement this, we also utilise our active stewardship and engagement activities.

This Fund did not refer to a benchmark index for portfolio construction. However, the reference benchmark could be used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There are 2 high risk issuers held in the fund, 1 of the issuer is not high risk due to governance issues therefore, since all pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment. We continue to review the position and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives. The other issuer is a Russian name we are unable to trade due to sanctions so cannot exit the position.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark, in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 45.54%.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

ESG Assessment Criteria: At the end of the previous year, 3 ESG high risk issuers were held in the fund. None of these were high risk due to governance issues. Therefore, since all pass the good governance check, the fund was able to invest in these.

ESG screening criteria: We confirm that during the previous period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there were no holdings in the fund that fail the agreed criteria in the previous period.

During the previous reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 46.8%.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. We use the six environmental objectives of the Taxonomy to inform Environmental contributions, including:

(1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards were met by applying certain PAI's, where relevant, to these underlying assets. The Fund invested a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives.

● In which economic sectors were the investments made?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

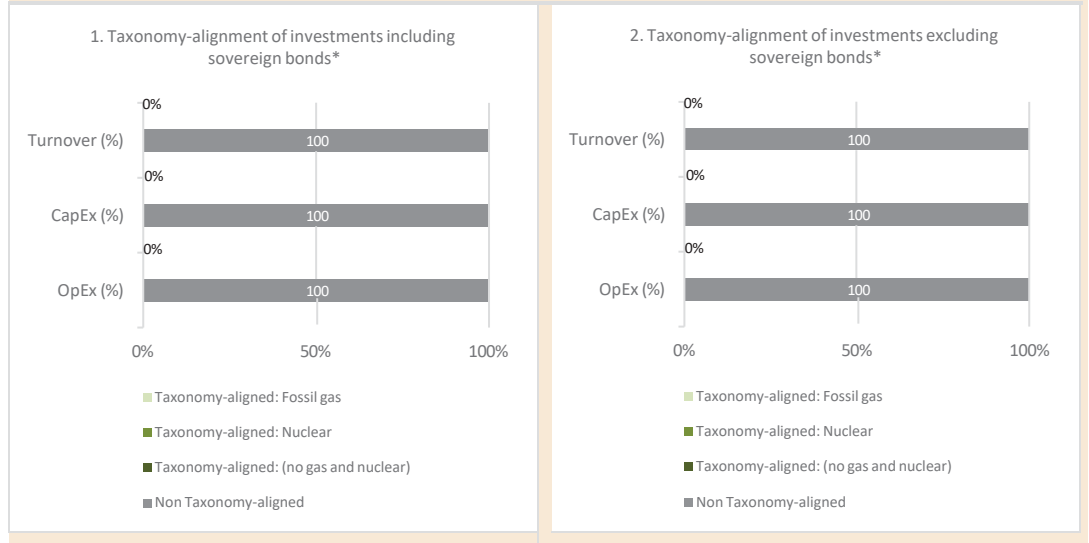

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 16%

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 12%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 11% of assets in the “Other” category. The investments included under “other” are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund’s screening, scoring requirements and benchmark targets ensure that the portfolio is invested in companies that uphold appropriate ESG standards. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

Not applicable

Product name: **Global Real Estate Securities Sustainable Fund**

Legal entity identifier **JCSNRTX2P3VQCSCY9U38**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.29% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors.

Fund invests in high-quality companies that have been identified through our rigorous listed real estate research process which takes into consideration the sustainability of the business in its broadest sense and the company's environmental, social and governance (ESG) performance.

This process powers both our investment insights and also our assessment of a company's ESG risks and opportunities to better understand risk and return potential resulting in positively tilted portfolio from sustainability and ESG perspective.

The Fund uses our proprietary ESG House Score, which is primarily a quantitative assessment, and on-desk ESG Quality Score assessment conducted by Fund Managers/Analysts, to identify and exclude

those companies exposed to the highest ESG risks.

There are three core principles which underpin our Sustainable investment approach and the time we dedicate to ESG analysis as part of our overall equity research process:

- ESG factors are financially material, and impact corporate performance.
- Understanding ESG risks and opportunities alongside other financial metrics allows us to make better investment decisions.
- Informed and constructive engagement helps foster better companies, enhancing the value of our clients' investments.

This Fund has a financial benchmark that is used for portfolio construction but does not incorporate any sustainable criteria and is not selected for the purpose of attaining these characteristics. This financial benchmark is used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Fund aims to have a positive tilt towards sustainable leaders, i.e., those with an ESG Quality score of 1 or 2, with at least 50% of the Fund invested in companies with best-in-class ESG credentials addressing global environmental and societal challenges ("Sustainable leaders"). As a minimum, Real Estate Companies are expected to have ESG credentials that are considered average within the region they operate to be considered for investment. As at year-end, 17.6% of the fund had an ESG Quality score of 1, 38.3% had an ESG Quality score of 2 and 41.2% had an ESG Quality score of 3.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, State Owned Enterprises (SOEs), Controversial Weapons, Tobacco, Thermal Coal, Oil & Gas and Electricity Generation. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of issuers with an ESG House Score by region that are in the benchmark.

● **...and compared to previous periods?**

N/A - No Previous report

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

(1) The Fund's sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

(2) Sustainable Investment Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches: i. a quantitative methodology based on a combination of publicly available data sources; and ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abdrn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated

Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis

- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance

- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

Largest Investments	Sector	% Assets	Country
PROLOGIS INC	Real Estate	8.76	United States of America
EQUINIX INC	Real Estate	5.93	United States of America

AMERICAN HOMES 4 RENT- A	Real Estate	1.73	United States of America
BRIXMOR PROPERTY GROUP INC	Real Estate	1.68	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 20% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Real Estate	Real Estate	97.02
Financials	Financial Services	0.71

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

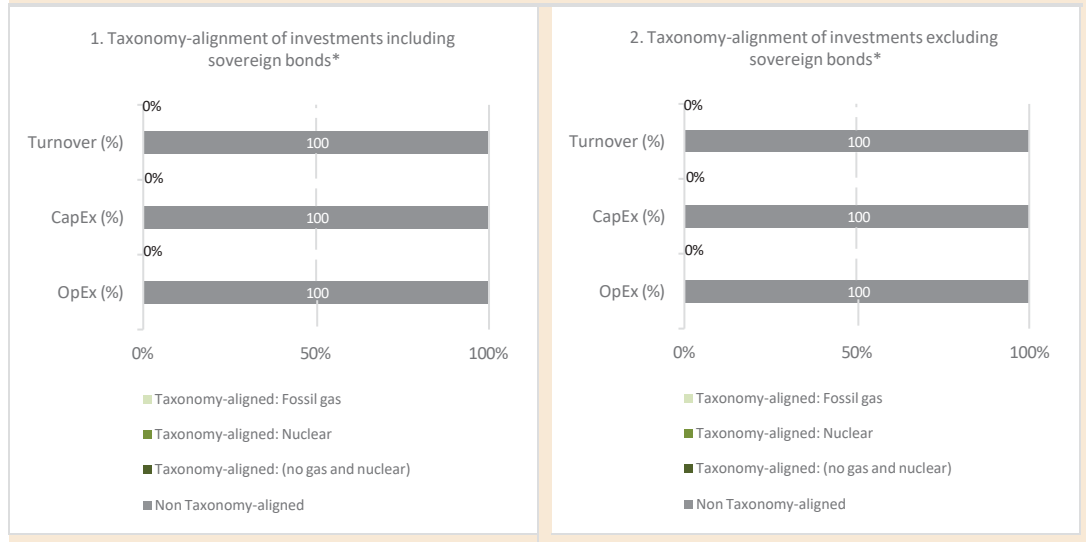

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 29.61% of assets as at the year end date and is representative of the Reference Period

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 13.67%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.44% of assets in the “Other” category. The investments included under “other” are cash, money market instruments, derivatives and may also include sovereign bonds. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund’s screening, scoring requirements and benchmark targets ensure that the portfolio is invested in companies that uphold appropriate ESG standards. The fund has also engaged with issuers on topics which may include Climate change, Environment, Labour, Human rights, Corporate Governance and Behaviour.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Product name: **Global Impact Equity Fund**

Sustainable investment objective

Does this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> X Yes	<input type="radio"/> <input type="radio"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective : 45.10%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective : 50.81%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective is to invest in companies listed globally that intentionally contribute to positive measurable environmental and/or social outcomes through their products. We use the United Nations' (UN) Sustainable Development Agenda and the associated Sustainable Development Goals (SDGs) to help us define environmental and social issues and determine a company's positive contribution. This is seen in our Impact Pillar Framework which maps the SDGs to eight investable themes: Circular Economy, Sustainable Energy, Food & Agriculture, Water & Sanitation, Health & Social Care, Financial Inclusion, Sustainable Real Estate & Infrastructure, Education & Employment. We also invest up to 10% of the Fund in 'Impact Leaders' which are companies that enable products in each of our pillars as integral parts of pillar supply chains.

We use a 'theory of change' to identify potential investments, examining specific local, regional and/or global issues and how a company's inputs and activities deliver specific outputs and contribute to outcomes and ultimately impact. Our minimum criterion for investment is a company's input, or its

'intentionality'. We want to see a board level strategy as well as meaningful investment (a minimum of 30% of total budget) directed towards developing products that create positive measureable impacts.

All companies in the portfolio invested a minimum of 30% in the development of products and services that sit within one of our eight impact pillars. In reality, most companies invested materially more than 50% of their budgets into products designed to deliver a positive impact. At the end of 2023, the Fund had exposure to all eight of the impact pillars.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The Fund invested in companies with a minimum of 30% of their investment budget allocated to products that advanced the UN's Sustainable Development Agenda.

The fund allocated to all eight of the impact pillars and maintained below 10% exposure to Impact Leaders. As at year-end, the fund's pillar exposure was:

- 19% Financial Inclusion
- 5% Circular Economy
- 17% Sustainable Energy
- 8% Water & Sanitation
- 8% Education & Employment
- 14% Sustainable Real Estate & Infrastructure
- 23% Health & Social Care
- 6% Impact Leaders

The Fund also excluded a minimum of 20% of the Fund's investment universe.

Further, key performance indicators (KPIs), or targeted outputs, have been set for each company held in the Fund in order to assess how products and services contribute to positive social and environmental outcomes globally. Please see the most recent <https://www.abrdn.com/docs?editionId=91bd0106-a6e6-4019-9faa-b01f010146ce> for full discussion on these KPIs as they will vary year by year.

We also confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

● **...and compared to previous periods?**

At the end of the previous year, the fund's pillar exposure was:

- 17% Financial Inclusion
- 5% Circular Economy
- 17% Sustainable Energy
- 1% Food & Agriculture
- 6% Water & Sanitation
- 4% Education & Employment

- 15% Sustainable Real Estate & Infrastructure
- 25% Health & Social Care
- 8% Impact Leaders

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abdrn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com

under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

Real Estate	Real Estate	7.55

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 45%

● **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective is 51%

● **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The Fund invested 4% of assets in the “not sustainable” category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

● **What actions have been taken to attain the sustainable investment objective during the reference period?**

Diverse Impact Exposure:

We aim to invest in companies whose products and services align with one of these pillars and measure how the products help countries achieve the UN's sustainable development agenda. We believe companies that intentionally develop products aimed at solving some of the world's biggest problems offer attractive investment characteristics. These businesses are often aligned with governments and regulators and should benefit from structural growth opportunities. During the reference period we had holdings exposed to all eight of our impact pillars.

Avoiding negative impact:

We assess each company in a holistic manner, considering the potential for positive and negative impact of all business segments, products and services. As part of this process, we also revisit the company's ESG assessments by our on-desk analysts and ESG investment team. In doing so, we consider the impact of the company's management of ESG issues on its potential for generating positive impact.

Because the fund aims to invest in companies that aim to have a positive impact on the environment and society, we avoid any investment that we consider may detract from progress in one of our other pillars. We do not weigh positive and negative impacts against each other to calculate 'net impact'. Instead, we aim to establish that operations and other business segments are at a minimum 'neutral' in terms of their impact on the environment and society, or that there is a clear, time-bound plan to transition potential negative impacts into neutral or positive impacts.

Monitoring company progress in achieving impact:

We aim to review the companies in the investable universe at least annually. Companies will be removed from the investable universe if:

- The company begins to pursue a strategy that does not align to one of our impact pillars.
- The company does not provide sufficient evidence of impact maturity progression over what we would consider an appropriate timeline.
- Red flags, controversies and/or incidents emerge that highlight a persistent, structural ESG problem within the company's operations, strategy or culture, to which the company does not appropriately respond.

abrdn's Impact Management Group is the governing body that reviews new investment opportunities. This Group peer reviews all new candidates for the impact fund and its investable universe. The Group meets weekly and includes the fund's portfolio managers, analysts from across our global and regional equity teams, and senior members of the Investment Sustainability Group. In order for a company to be included in the investable universe, consensus must be reached by the Group.

Company self-disclosure is a crucial part of our approach to impact investing. We believe that if a company intends to deliver a product to address a specific environmental or social need, the impact must be reported. Therefore we heavily rely on engagement with companies and our conversations with the supervisory board, executive management teams, and divisional heads.

Impact reporting:

Impact measurement and reporting is a developing area. We are committed to presenting regular, transparent accounts of the impact generated by companies in the fund. We agree with the Global Impact Investing Network's stance that "context is critical to interpreting impact results in a robust and reliable way." In addition to case studies and pillar level data, we also analyse the impact companies delivered according to country and region. And we compare this to international sources, most frequently the World Bank databank, to understand how the impact delivered compares to the underlying country-specific issues and needs. Above all, we aim to frame the local impact delivered against the global issues our portfolio targets.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did the reference benchmark differ from a broad market index?***
Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Product name: **Multi-Asset Climate Opportunities Fund**

Legal entity identifier **213800FB19YE179R9797**

Sustainable investment objective

Does this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> X Yes	<input type="radio"/> <input type="radio"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 82.09% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 7.72%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

We confirm that the fund fulfilled its sustainable investment objective to make a minimum of sustainable investments with an environmental objective of 75%, in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy, in the period under review. The primary indicator used for this purpose is corporate revenue alignment in activities identified by the EU Taxonomy as Sustainable Activities.

The investment objective of the Fund is to generate growth by investing in a diversified portfolio of equities and corporate bonds issued by companies whose core business enables the transition to a sustainable, low carbon economy. To achieve that objective, a key determinant of inclusion will be those activities identified by the EU Taxonomy as Sustainable Activities. The fund's Sustainable Investment figure was 90% of which the environmental objective was 82%; a very high alignment with the six objectives identified by the EU Taxonomy and above our minimum objective of 75%. This data is based on an assessment of the revenue exposure of these companies, alongside the use of proceeds for labelled bonds, to activities

aligned with environmental objectives. Although these activities are mostly aligned with the Taxonomy's environmental objectives, we currently do not have the necessary DNSH (Do No Significant Harm) and Minimum Social Safeguards information to classify them as aligned with the EU Taxonomy, so, as a result, we classify them as environmental, but not aligned with the Taxonomy.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The fund has achieved a high alignment with the environmental revenue indicators of 82% which is above the fund's target of 75%. Given our focus on labelled bonds, our credit allocation has a nearly 100% SI%, with infrastructure around 90%, and equities north of 75%.

The fund aims to contribute to climate change by investing in renewable energy, energy efficiency, resource efficiency, low carbon transport, and adaptation companies and issuances. Companies exposed to these areas enable their customers to have low emissions but do not always have low emissions themselves (particularly those with manufacturing operations). As a result, the fund does not aim to have extremely low carbon intensity, merely to be lower than typical equity benchmarks; we achieve this through optimisation processes and screening. The fund succeeds in its objective.

The fund's combined equity and credit allocation has a Scope 1 and 2 carbon intensity of 120tCO₂e/\$m rev vs 150tCO₂e/\$m rev for the MSCI All Companies World Index; the equity-only portion is even lower at 109tCO₂e/\$m rev. It is important to note that the fund is a multi-asset fund and does not have a benchmark, so comparisons are not straightforward.

The fund's positive and negative screens exclude over 90% of the issuers in the MSCI ACWI equity benchmark, weighted by market capitalisation, which is in line with expectations.

● **...and compared to previous periods?**

The alignment with environmental revenue indicators in the previous reported period was similar to that reported in the current reporting period (82% vs 83% previously). We expect the reported 'green' revenues to be consistently high as the environmental revenue of green bonds & most renewable infrastructure are both classified as 100% environmental, with the average equity environmental revenue approximately 75%. The change in reported figures is explained by shifts in asset allocation but are not expected to fluctuate considerably given the ranges expressed above.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associate activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. Abdrn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- o abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- o Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- o Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance
- o On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable

How did this financial product consider principal adverse impacts on sustainability factors?

(1) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period

(2) GHG Emissions Scope 1 & 2 and carbon footprint: we ensure our equity allocation is lower than a broad global equity benchmark, and achieve this through screening and optimisation processes.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
- - 31/12/2023

Largest Investments	Sector	% Assets	Country
GREENCOAT UK WIND PLC	Real Estate	3.65	United Kingdom
RENEWABLES INFRASTRUCTURE GR	Energy	2.92	United Kingdom
LA BANQUE POSTALE 1.375% 04/24/2029	Financials	2.47	France
GREENCOAT RENEWABLES PLC	Financials	2.10	Ireland
INDIA GREEN POWER HOLD 4% 02/22/2027	Utilities	1.93	India
SUZANO AUSTRIA GMBH 3.75% 01/15/2031	Materials	1.89	Brazil

SEVERN TRENT WATER UTIL 3.625% 01/16/2026	Utilities	1.06	United Kingdom
VESTAS WIND SYSTEMS A/S	Energy	1.06	Denmark

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

The Fund committed to a minimum of 75% in Sustainable Investments with an environmental objective. The Fund invested a maximum of 25% of assets in the "Non Sustainable" category, which is mainly made up of cash, money market instruments and derivatives.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	6.63
Consumer Discretionary	Automobiles Manufacturing	0.89
Financials	Financial Services	3.59
Financials	Banking	5.16
Financials	Real Estate	2.78
Financials	Banks	3.19
Financials	Funds & Trusts	0.76
Industrials	Industrial Products	6.91
Industrials	Industrial Services	6.70
Materials	Materials	2.12
Materials	Forest & Paper Products Manufacturing	1.89
Technology	Software & Tech Services	0.56
Technology	Tech Hardware & Semiconductors	1.91
Consumer Staples	Consumer Staple Products	0.94
Energy	Renewable Energy	8.99
Utilities	Utilities	15.50
Utilities	Power Generation	2.91
Real Estate	Real Estate	12.08
Communications	Telecommunications	1.51
Communications	Wireline Telecommunications Services	1.68
Government	Government Local	1.04

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review.

These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What was the share of investments made in transitional and enabling activities?

The fund holds 0% investments made in transitional and enabling activities.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

No change

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy is 82%

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 8%

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 10% of assets in the “not sustainable” category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

The fund’s extensive screening program me has ensured that the portfolio is focused exclusively on activities that drive the transition to a low carbon, sustainable economy.
