## What is this product?

### Type

Emerging Market Local Currency Debt Fund (the "Fund") is a US Dollar denominated sub-fund of a SICAV (société d'investissement à capital variable), abrdn SICAV II, incorporated in Luxembourg.

### Term

abrdn SICAV II (the "Company") has no maturity date. The Fund and the Company may not be unilaterally terminated by abrdn Investments Luxembourg S.A.

### Objective

The Fund aims to provide a combination of income and growth by investing in bond securities and Emerging Market currencies.

The Fund aims to outperform the JP Morgan GBI-EM Global Diversified Index (USD) benchmark (before charges).

### Portfolio Securities

- The Fund invests at least 70% of its assets in Emerging Market currencies and Emerging Market local currency bonds.
- The Fund may also invest in other bonds (including non-Emerging Market bonds), money market instruments, cash and near cash, derivatives and collective investment schemes.
- The Fund may invest up to 20% of its assets in Mainland China bonds.
- Investment in bonds will follow the "Emerging Market Local Currency Debt Promoting ESG Investment Approach".
- This approach evaluates the Environmental, Social, Governance and Political ("ESGP") characteristics of sovereign issuers, which results in an ESGP score being assigned to each issuer. This score allows countries falling below a threshold to be excluded from the investment universe.
- In addition to the exclusion threshold, a forward-looking Direction of Travel assessment is conducted, allowing exclusions to be overridden where ESGP weaknesses are being adequately addressed by the issuer and this is not reflected in the data.
- For corporate bonds, the abrdn ESG House Score is used to exclude those companies exposed to the highest ESG risks. In addition, abrdn apply a set of company exclusions, which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Green bonds, Social bonds or Sustainable bonds issued by excluded countries or companies excluded by the environmental screens are permitted, where the proceeds of such issues can be confirmed as having a positive environmental or social impact.
- Financial derivative instruments, money-market instruments and cash may not adhere to this approach.

### Management Process

- The Fund is actively managed.
- Through the application of the Emerging Market Local Currency Debt Promoting ESG Investment Approach (the "Investment Approach"), the Fund has an expected minimum of 5% in Sustainable Investments.
- Engagement with issuers is a part of abrdn's investment process and ongoing stewardship programme. As part of this, up to 5% of asset may be invested in companies in high carbon emitting sectors, which are seen as having ambitious and credible targets to decarbonise their operations, in order to support their transition to ultimately comply with the environmental screens.
- Further detail of the Investment Approach is published at [www.abrdn.com](http://www.abrdn.com) under "Fund Centre".
- The benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.

### Derivatives and Techniques

- The fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

### This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus). If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

### Intended Retail Investor

Investors with basic investment knowledge. Investors who can accept large short term losses. Investors wanting an income and some growth over the longer term (5 years or more). Investors with a specific need around a sustainability-related outcome. The Fund has specific and generic risks with a risk rating as per the risk indicator. The Fund is intended for general sale to retail and professional investors through all distribution channels with or without professional advice.

The Fund's depository is Citibank Europe plc Luxembourg Branch. The prospectus, the articles of association, the annual reports and interim reports may be obtained free of charge from our website or via the contact details in 'Other relevant information'. All documents are available in English and German; the prospectus is also available in French and Italian. ## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you sell it at an earlier stage. The value of investments and the income from them can go down as well as up, and you may get back less than you invested.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Where the currency of the country where you are resident is different to the currency of the product, **please be aware of currency risk**. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Further information on risks is detailed in the prospectus available at [www.abrdn.com](http://www.abrdn.com) or on request from the management company.

This product does not include any protection from future market performance or any capital guarantee against credit risk, so you could lose some or all of your investment.

### Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		\$10,000	
		If you exit after 1 year	If you exit after 5 years
<b>Scenarios</b>			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	\$4,530	\$4,520
	Average return each year	-54.70%	-14.70%
Unfavourable	What you might get back after costs	\$7,060	\$7,370
	Average return each year	-29.40%	-5.90%
Moderate	What you might get back after costs	\$8,930	\$9,110
	Average return each year	-10.70%	-1.80%
Favourable	What you might get back after costs	\$10,600	\$12,460
	Average return each year	6.00%	4.50%

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between September 2017 and September 2022. The moderate scenario occurred for an investment in the benchmark between March 2015 and March 2020. The favourable scenario occurred for an investment in the benchmark between December 2015 and December 2020.

## What happens if the Company is unable to pay out?

There is no financial compensation scheme for retail investors in SICAVs domiciled in Luxembourg. In the absence of a compensation scheme applicable to investments in the Fund, investors may face a financial loss of up to their entire investment amount.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10,000 USD is invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	\$1,106	\$1,561
<b>Annual cost impact (*)</b>	11.1%	3.2% each year

\* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.4% before costs and -1.8% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	5.00% of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to \$500
