

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Short Dated Corporate Bond Fund, a US Dollar denominated sub fund of the abrdn SICAV II, S Acc Hedged GBP Shares (ISIN: LU2530216915). This fund is managed by abrdn Investments Luxembourg S.A.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

The Fund aims to achieve a combination of income and growth by investing in bonds with a maturity of up to 5 years.
The Fund aims to outperform the Bloomberg Global Aggregate Corporate Bond 1- 5 Year ex Subordinated (hedged to USD) benchmark (before charges).

Investment Policy Portfolio Securities

- The Fund invests at least 70% of its assets in investment grade bonds issued by corporations with a maturity of up to 5 years.
- The Fund may invest up to 20% in sub-investment grade bonds.
- Up to 10% of the Fund may be invested in Mainland Chinese bonds listed or traded on Chinese Markets.
- The Fund may invest in a wide range of bonds (e.g. government, convertible, supranational, government-backed, index-linked, asset backed and mortgage backed).
- The Fund may invest up to 20% of its net assets in asset backed securities.
- Non-US Dollar denominated assets will typically be hedged back to US Dollars.
- Investment in corporate bonds will follow the abrdn "Global Short Dated Promoting ESG Investment Approach" (the "Investment Approach").
- This approach utilises abrdn's fixed income investment process, which enables portfolio managers to qualitatively assess how ESG factors are likely to impact on the company's ability to repay its debt, both now and in the future. To complement this research, the abrdn ESG House Score is used to quantitatively identify and exclude those companies exposed to the highest ESG risks. In addition, abrdn apply a set of company exclusions, which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.
- Green bonds, Social bonds or Sustainable bonds issued by companies otherwise excluded by the environmental screens are permitted, where the proceeds of such issues can be confirmed as having a positive environmental impact.
- Financial derivative instruments, money-market instruments and cash may not adhere to this approach.

Management Process

- The Fund is actively managed.
- Through the application of the Investment Approach, the Fund targets a lower carbon intensity than the benchmark.
- No minimum in Sustainable Investments.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 3 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.
- The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- Convertible securities are investments that can be changed into

- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies, in order to inform portfolio construction. As part of this, up to 5% of asset may be invested in companies in high carbon emitting sectors, which are seen as having ambitious and credible targets to decarbonise their operations, in order to support their transition to ultimately comply with the environmental screens.
- Further detail of this process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".
- The benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints, but does not incorporate any sustainable criteria.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark. Due to the Fund's risk constraints, its performance profile is not ordinarily expected to deviate significantly from that of the benchmark over the longer term.

Derivatives and Techniques

- The Fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the fund is primarily invested. Usage of derivatives is monitored to ensure that the fund is not exposed to excessive or unintended risks.

This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR")

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

another form upon certain triggers. As such, they can exhibit credit, equity and fixed interest risk. Contingent convertible securities (CoCos) are similar to convertible securities but have additional triggers which mean that they are more vulnerable to losses and volatile price movements and hence become less liquid.

- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in companies which similar funds do not (and thus perform differently) and which do not align with the personal views of any individual investor.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to

value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

Where the share class is described as "hedged", currency hedging

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.35%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

PAST PERFORMANCE

Global Short Dated Corporate Bond Fund, S Acc Hedged GBP Shares, 31 December 2022

% Returns

techniques are used which will reduce, but not eliminate, exchange rate risk. In particular, the currency being hedged is not necessarily related to the currencies within the fund. Such techniques also give rise to additional risks and costs.

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure is an estimate based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund. An estimate is used in order to provide the figure that will most likely be charged. The ongoing charges figure is at 30/01/2023.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus. For more information about charges, please see the Prospectus which is available at www.abrdn.com.

Past performance is not a guide to future performance. Performance is net of charges and does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section. Performance is calculated in GBP.

The fund was launched in 2022. The share/unit class was launched in 2022.

Benchmark - Bloomberg Global Aggregate Corporate ex Subordinated (1-5 Year) (Hedged to GBP).

The Fund was originally launched under SICAV III and moved to SICAV II on 24/11/2022. Historic performance data up to 24/11/2022 therefore relates to the SICAV III sub-fund.
