Allianz European Pension Investments - Allianz Strategy 15 Share Class CT (EUR)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: LU0398560267
WKN: A0RCVJ

Objectives and Investment Policy

The investment objective is geared, in the long term, towards generating mainly capital growth with regard to the portfolio's equity portion by investing in the global equity markets and, with regard to the portfolio's bond / money market portion, towards generating a market driven return with reference to the Euro bond / money markets within the scope of the investment policy. Overall, the goal is to achieve a performance comparable to a balanced portfolio with a volatility range of 1 % - 7 %. The assessment of the volatility of the capital markets by the Investment Manager is an important factor in this process, with aim of typically not falling below or exceeding a volatility of the Share price within a range of 1 % - 7 % on a medium to long-term average, similar to a portfolio consisting of 15 % global equity markets and 85 % medium term Euro bond markets.

This Sub-Fund is not managed by us in reference to a Benchmark. We follow an active management approach.

We invest directly or using derivatives in bonds of good credit quality, money markets instruments as well as cash and up to 35% of sub-fund's assets in equities and equivalent securities. The issuers of these securities must mostly have their registered offices in a developed country. We may invest in bonds with a

duration of max. 1 year (cash bonds) which have to fulfill certain environmental, social and corporate governance criteria. Further, up to 10% of sub-fund's assets may be invested in other target funds. The sub-fund has an average duration (residual maturity) between zero and nine years. The currency risk for the sub-fund's assets which are not related to equities is limited to a maximum of 5% from an Euro perspective.

You may redeem shares of the fund usually on each business day.

We reinvest the income into the fund.

Recommended Holding Period: 3 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 3 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 3 might be subject to low to medium price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.
