Allianz Global Investors Fund - Allianz Credit Opportunities Share Class IT13 (EUR)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU1505874849
WKN: A2ATH0

Objectives and Investment Policy

Long term capital growth by investing in global Bond Markets.

We follow an active management approach with the aim to outperform the Benchmark. In selecting and weighting the fund's assets we do not replicate or reproduce the Benchmark. Sub-Fund assets therefore deviate significantly from the Benchmark.

Sub-Fund assets are primarily invested by us in global bonds as described in the investment objective. Sub-Fund assets may be completely invested in Emerging Markets. Sub-Fund assets (excluding ABS/MBS) may be completely invested in High Yield bonds bearing a typically higher risk and higher potential of gains. Max. 20 % of Sub-Fund assets may be invested in ABS and/or MBS with a good credit rating. All bonds and money market instruments must have at the time of acquisition a rating of at least B- or a comparable rating from a recognised rating agency. Max. 10% of Sub-Fund assets may be invested in Equities. Included in the aforementioned limit are Equities and comparable securities or rights in the exercise of subscription, conversion and option rights on investments such as convertible bonds, contingent convertible bonds and bonds with warrants. The credit long / short strategy encompasses a broad diversity of credit strategies mainly implemented in the bond market. One common strategy is to benefit from price discrepancies between the securities of one or more issuers with the same sector or market segment. Strategies may vary in respect of credit-rating requirements, regional exposure and other additional

requirements. Max. 100% Sub-Fund assets may be held in deposits and/or may be invested directly in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose. Max. 10% non-EUR Currency Exposure. The Duration of Sub-Fund assets should be between minus 1 and plus 2 years.

Benchmark: €STR (in EUR).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day.

We reinvest the income into the fund.

Recommended Holding Period: 4 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 2 have shown in the past a low volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 2 might be subject to low price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.
