## Objectives and Investment Policy

Long-term capital growth by investing in German equity markets with a focus on micro to small cap companies.

We manage this Sub-Fund in reference to a Benchmark. Sub-Fund's Benchmark plays a role for the Sub-Fund's performance objectives and measures. We follow an active management approach with the aim to outperform the Benchmark. Although our deviation from the investment universe, weightings and risk characteristics of the Benchmark is likely to be material in our own discretion, the minority of the Sub-Fund's investments (excluding derivatives) may consist of components of the Benchmark.

The Sub-Fund is PEA (Plan d'Epargne en Actions) eligible in France. Therefore, at least 75% of Sub-Fund assets are permanently physically invested by us in Equities as described in the investment objective. Micro to small cap companies means companies whose market capitalisation is a maximum of 1-times the market capitalisation of the largest security (in terms of market capitalisation) in the German SDAX Index. Max. 25% of Sub-Fund assets may be invested in Equities by us other than described in the investment objective. Max. 25 % of Sub-Fund assets may be invested by us in Emerging Markets. Max. 25% of Sub Fund assets may be held by us directly in time deposits and/or (up to 20% of Sub-Fund assets) in deposits at sight and/or

invested in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds for liquidity management. Max. 10% of Sub-Fund assets may be invested by us in UCITS/UCI. All bonds and money market instruments must have at the time of acquisition a rating of at least B- or a comparable rating from a recognised rating agency. Sub-Fund classifies as "equity-fund" according to German Investment Tax Act (GITA).

Benchmark: SDAX Total Return Gross (in EUR).

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

## Risk and Reward Profile

Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

### Why is the fund in this category?

Funds of category 6 have shown in the past a high volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 6 might be subject to high price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

The fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the fund price may fall.
