Managed by Allianz Global Investors GmbH, part of  
Allianz Global Investors

ISIN: LU2014481662  
WKN: A2PMSG

## Objectives and Investment Policy

Long-term capital growth and income by investing in global Bond Markets. As part of the investment process, the Investment Manager applies an opportunistic approach, which provides in particular that a spectrum of macro and credit opportunities are accessed.

We follow an active management approach with the aim to outperform the Benchmark. In selecting and weighting the fund's assets we do not replicate or reproduce the Benchmark. Sub-Fund assets therefore deviate significantly from the Benchmark.

Sub-Fund assets are primarily invested in bonds as described in the investment objective. Max. 30% of Sub-Fund assets may be invested in bonds which at the time of acquisition have a rating of BB+ or below (Standard & Poor's and Fitch) or, if unrated, as determined by the Investment Manager to be of comparable quality. Max. 30% of Sub-Fund assets may be invested in Emerging Markets. Max. 20% of Sub-Fund assets may be invested in the PRC bond markets. Max. 20% of Sub-Fund assets may be invested in ABS and/or MBS. Max. 100% Sub-Fund assets may be held in deposits and/or may be invested directly in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose. Max. 10% of Sub-Fund assets may be invested in UCITS and/or UCI. Duration of Sub-

Fund assets should be between 0 and 9 years.

Exposure to the base currency of the fund (USD) will be hedged to a large extent against the reference currency of the shareclass (EUR) which reduces the potential risks and limits potential gains from exchange rate movements.

Benchmark: SOFR (hedged into EUR).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a monthly basis.

Recommended Holding Period: 3 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).
