(the "Sub-Fund"), a sub-fund of Alatus UCITS (the "Fund")

Class I EUR (the "Class"), ISIN code LU1063489360

The Fund has appointed FundPartner Solutions (Europe) S.A. as management company.

Objectives and investment policy

Investment Objective

The investment objective of the Sub-Fund is to provide its investors with returns superior to the equity index STOXX Europe 600 Net Return Index ("the Benchmark") by investing primarily in the publicly traded equities of companies worldwide with a special focus in Europe. The Sub-Fund is actively managed. The benchmark index of the Sub-Fund is STOXX Europe 600 Net Return Index. It is mentioned only for information purposes and the Sub-Fund does not track the index. The Sub-Fund can deviate significantly from the benchmark index.

There can be no assurance that the investment objective will be achieved and investment result may vary over time.

The Sub-Fund gives emphasis to investing in companies that are perceived to offer a compelling value investment opportunity and the possibility of significant capital appreciation as a result of proposed business strategies which may substantially increase shareholders value over the medium term.

Investment Policy

The Sub-Fund will offer an exposure to any kind of equity and equity-related securities (including but not limited to ordinary or preferred shares, ADR, GDR, convertible bonds, reverse convertible bonds) of companies which are domiciled, headquartered or exercise the predominant part of their economic activity in Europe.

In order to achieve its objective, the Sub-Fund will mainly invest directly in the securities mentioned above and/or in any transferable securities (such as structured products as detailed in the Fund's prospectus).

Despite the geographical focus on Europe, the choice of investments will not be limited neither by geographical area (including emerging markets), nor economic sector, nor in terms of currencies in which investments will be denominated. However, depending on financial market conditions, a particular focus may be placed in a single country, and/or in a single economic sector, and/or in a single currency.

On an ancillary basis, within the limits defined in the prospectus, the Sub-Fund may invest directly in any type of other eligible assets other than those referred above (transferable securities, money market instruments, UCIs and deposits).

The Sub-Fund will not invest more than 10% of its net assets in UCIs or UCITS. For hedging and for any other purposes, the Sub-Fund may use financial

derivative instruments within the limits and descriptions set out in the prospectus. The use of derivative instrument may increase leverage and imply additional costs and risks.

If the investment manager considers this to be in the best interest of the shareholders, the Sub-Fund may also, on a temporary basis and for defensive purposes, hold, up to 100% of its net assets in liquidities such as, cash deposits, money market funds and money market instruments.

Risk and reward profile

Risk Disclaimer

- This current risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Sub-Fund.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category, which corresponds to Number 1, cannot be regarded as being risk-free.
- The Sub-Fund does not provide any capital guarantee or asset protection measures.

Why is this Sub-Fund in this category?

The Sub-Fund's investment strategy is to have an exposure to equity markets with a special focus in Europe, by investing mainly in equities or equity related securities. Therefore, the risk/reward indicator corresponds to the underlying volatility of the European equity markets. This profile indicates the investment to carry a high level of risk.

Are there any other particular Risks?

- **Liquidity risks:** The Sub-Fund may invest part of its assets in less liquid securities. Those are securities that cannot easily be sold or exchanged

for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.

- **Counterparty risks:** The Sub-Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Sub-Fund.
- **Credit risks:** The Sub-Fund may invest a portion of its assets in debt securities. The issuers of these debt securities may become insolvent, which will mean that the securities will lose all or some of their value.
- **Risks from the use of derivatives:** The Sub-Fund may use financial derivatives instruments which may result in the Sub-Fund being leveraged and may result in material fluctuations in the value of the Sub-Fund. Leverage on certain types of transactions including derivatives may impair the Sub-Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Sub-Fund not to achieve its intended objective.

Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Sub-Fund being exposed to a greater loss than the initial investment.

- **Operational risks:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the Management Company or by external third parties or may be damaged by external events, such as natural disasters.
