Term:
 Due date: none
 Unilateral termination by PRIIP manufacturer possible: yes
 Automatic termination of the PRIIPS: no

Objectives: The investment goal of the Fund is to achieve an above-average risk/return profile by investing in Asset-Backed Securities ("ABS") with low volatility and minimal correlation to traditional investments. ABS are securities which are typically issued by a special purpose company ("SPV") on the occasion of the securitization of assets. An asset securitization is the transformation of a pool of cash-flow generating assets into tradable securities. The purchase of the asset pool by the SPV is financed through the issuance of securities. Interest and principal payments on the securities are thereby exclusively derived from cash flows generated by the SPV's assets. The assets of the SPV are managed by a specialized portfolio manager and are comprised of diversified portfolios of loans, bonds, mortgages or similar credit instruments.

Intended retail investor: In the member state of origin, the product is intended for professional and private investors with a long-term investment horizon, a lot of experience and who are able to bear a full financial loss. The product may be used for capital appreciation.

What are the risks and what could I get in return?

Risk Indicator:

The risk indicator assumes you keep the product until 6 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the fund are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Key Information Document

Performance-Scenarios:

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

This type of unfavorable scenario occurred for an investment between 31.03.2019 - 31.03.2020 (if you exit after 1 year), 31.03.2014 - 31.03.2020 (if you exit after 6 years).

This type of moderate scenario occurred for an investment between 31.03.2017 - 31.03.2018 (if you exit after 1 year), 31.01.2015 - 31.01.2021 (if you exit after 6 years).

This type of favorable scenario occurred for an investment between 31.03.2020 - 31.03.2021 (if you exit after 1 year), 31.08.2012 - 31.08.2018 (if you exit after 6 years).

Recommended holding period: 6 years Example Investment: 100'000 EUR		If you exit after 1 year	If you exit after 6 years
Worst case scenario	You could lose some or all of your investment		
Stress scenario	What you might get back after costs	1'700 EUR	540 EUR
	Average return each year	-98.3 % p.a.	-58.1 % p.a.
Unfavourable scenario	What you might get back after costs	49'610 EUR	71'720 EUR
	Average return each year	-50.4 % p.a.	-5.4 % p.a.
Moderate scenario	What you might get back after costs	106'100 EUR	130'900 EUR
	Average return each year	6.1 % p.a.	4.6 % p.a.
Favourable scenario	What you might get back after costs	197'450 EUR	252'890 EUR
	Average return each year	97.4 % p.a.	16.7 % p.a.

The calculations of previous performance scenarios can be found under www.vpfundsolutions.com.

What happens if VP Fund Solutions (Liechtenstein) AG is unable to pay out?

Should the manufacturer, VP Fund Solutions (Liechtenstein) AG, or the custodian default on their obligations, the product is not included in the insolvent estate, and may be transferred or liquidated with the consent of the competent supervisory authority.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 100'000 EUR Investment.

	If you exit after 1 year	If you exit after 6 years
Total costs	7'742 EUR	26'946 EUR
Annual cost impact (*)	7.7 %	3.4 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.5 % before costs and 4.1 % after costs.

Key Information Document

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering into your investment. The maximum costs are indicated, you could pay less. The distribution costs are included.	3'000 EUR
Exit costs	The impact of the costs of exiting your investment when it matures.	2'000 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	The impact of the costs we annually deduct to manage your investment.	2'030 EUR
Transaction costs	This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	198 EUR
Incidental costs taken under specific conditions		
Performance fees and carried interest	A performance fee (max. 10.00%) may be charged. This is calculated on the amount by which the NAV exceeds the threshold price (high-water-mark plus hurdle-rate, if any). The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	302 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 6 years

Based on the risk/return profile, we recommend a holding period of at least 6 year(s) for this product. However, you can return the product to the manufacturer at the next NAV subject to the notice period specified in the fund documents. Early redemption may have a significant impact on the risk/return profile. In any case, there may be exit costs pursuant to the fund documents.

How can I complain?

To file a complaint about the product or about the conduct of the PRIIP manufacturer or the person advising on, or selling the product, please contact: VP Fund Solutions (Liechtenstein) AG, "Complaints Officer", 9490 Vaduz, Liechtenstein, www.vpfundsolutions.li, beschwerden@vpbank.com

Other relevant information

This chart shows the fund's performance as the percentage loss or gain per year over the last 10 years.

Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past

Performance is shown after deduction of ongoing charges. Any entry and exit charges are excluded from the calculation.

The share class shown has been launched on 22. July 2004.

The historical performance was calculated in EUR.
