This section I of the simplified prospectus contains key information about ALKEN FUND – European Opportunities (the "Sub-Fund"). For more information before investing, investors should consult the full prospectus of ALKEN FUND (the "Company") currently in force.

The rights and duties of the investor as well as the legal relationship with the Company are laid down in the full prospectus currently in force (the "Prospectus"). The Prospectus and the periodical reports may be obtained free of charge from the Company.

Investment objective

To provide capital growth and to enable investors to benefit from growth in the European equity market, primarily through dynamic investment in a growth/value style biased portfolio of equity securities of undervalued European companies with a high growth potential. This Sub-Fund is a relative return fund implying a medium tolerance to risk, with the objective to realise a relative net performance over the Dow Jones STOXX 600 EUR (Return) Index.

Investment policy

The Sub-Fund will invest at least 75% of its total assets in equity and equity related securities issued by companies that are headquartered in Europe or conduct the preponderant part of their activity in Europe.

The portfolio will contain a limited selection of securities considered as offering the greatest potential. Selection will comprise a mixture of "growth" and "value" stocks believed to have the potential to provide enhanced returns relative to the market. Growth stocks are those whose earnings are expected to grow faster than the average for the market, whereas value stocks, on the other hand, are inexpensive compared with the earnings or assets of the companies that issue them, often because they are in a mature or depressed industry, or because the company has suffered a setback. The Sub-Fund will be managed on a bottom up basis, whereby overweight and underweight positions in securities of a given country, sector and stock will be determined through the application of analytical techniques to such countries, sectors and stocks; furthermore, the Sub-Fund will endeavour to benefit from the regular movements of stock exchanges by investing according to geographical, sectorial and thematic trends.

The Sub-Fund will hold a diversified portfolio composed of securities in listed companies. These securities may consist of ordinary or preferred shares, convertible bonds, and to a lesser extent, warrants on transferable securities and options. The Sub-Fund may also invest up to 10% of its net assets in units of UCITS or up to 5% of its net assets in units of UCIs.

On an ancillary basis, the Sub-Fund may also hold liquid assets and money-market instruments.

Within the limits set out in the investment restrictions in the main body of the Prospectus, the Sub-Fund may use derivative techniques and instruments for hedging purposes.

In particular, the Sub-Fund may use call or put options and/or futures and/or forward contracts on transferable securities, interest rates, indices and other financial instruments, such as swaps agreements, traded on Regulated Markets or over-the-counter.

Investments in debt securities, within the meaning of Council Directive 2003/48/EC ("EU Savings Directive") on the taxation of savings income, will be limited to 15% of the Sub-Fund's net assets; in exceptional circumstances only, when market conditions so

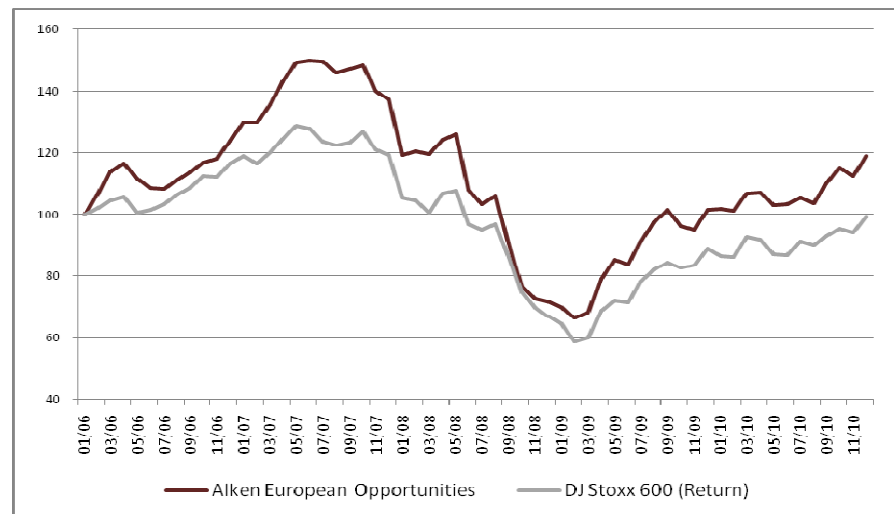

command, such limit may be exceeded but, in any event, investments of this kind will then not exceed 25% of the Sub-Fund's net assets. It is therefore presently expected that capital gains realised by Shareholders on the disposal of Shares in the Sub-Fund will not be subject to the reporting or withholding requirements imposed by the EU Savings Directive.

Sub-Fund's risk profile

The Sub-Fund is subject to the specific risks linked to investments in equity securities and collective investment schemes as well as to market volatility linked to the investment in derivative instruments and warrants. Furthermore, a risk of illiquidity of the Sub-Fund may not be excluded. Therefore, no assurance can be given that the invested capital will be preserved, or that capital appreciation will occur.

For full details of the risks applicable to investing in this Sub-Fund, Shareholders are advised to refer to "Risk Considerations" in the Prospectus.

Performance of the Sub-Fund

The performance of the Sub-Fund is 17.34% for the year 2010.

Performance disclaimer

Past performance is not necessarily a guide to future performance. Investors may not get back the full amount invested, as prices of shares and the income from them, as applicable, may fall as well as rise. Please note that the performance data set out above does not take account of any commissions and costs incurred on the issue and redemption of Shares.

Profile of the typical investor
