### OBJECTIVES

Long-term capital growth and income by investing in a broad range of asset classes, in particular in the global bond-, equity-, alternative- and money markets. The Sub-Fund achieves its investment objective by investing in investment funds (including internal SFDR Target Funds) with different regional focuses from a global investment universe. Overall, the goal is to achieve over the medium-term a performance comparable to a balanced portfolio consisting of global Equity Markets and Euro Bond Markets. The assessment of the volatility of the capital markets by the Investment Manager is an important factor in this process, with the aim of typically not falling below or exceeding a volatility of the Share price within a range of 6% to 12% on a medium to long-term average.

Sub-Fund follows the MAS Strategy and invests in Green Bonds and/or in Equities and/or Debt Securities of companies in accordance with strategies that promote either environmental and/or social characteristics and/or have Sustainable Investments as objective with simultaneous application of certain minimum exclusion criteria for direct investments.

Min. 70% of Sub-Fund assets are invested in UCITS and/or UCI as described in the investment objective. Max. 30% of Sub-Fund assets may be invested in Equities and/or bonds in accordance with the investment objective and/or other than described in the investment objective. Max. 35% of Sub-Fund assets may be invested in Emerging Market (including Emerging Market funds). Max.

25% of Sub-Fund assets may be invested in High-Yield investments (including High-Yield funds) bearing a typically higher risk and higher potential of gains. Max. 20 % of Sub-Fund assets may be invested in ABS and/or MBS. Max. 100% Sub-Fund assets may be invested in Money Market Funds and/or (up to 30% of Sub-Fund assets) may be held in Deposits and/or may be invested in money market instruments on a temporary basis for liquidity management and/or defensive purpose. You may redeem shares of the Sub-Fund usually on each business day. We reinvest the income into the Sub-Fund.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

### Recommended holding period: 4 years

If you disinvest earlier, there is a higher risk that you might get back only poor returns, or not even the sum you

invested. The Sub-Fund is open-ended which means you can redeem money back at every NAV calculation and without having to pay penalties. If applicable to your Sub-Fund you will pay the exit fees only. The detailed procedure to redeem from the Sub-Fund is described in the Prospectus.
