

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Allianz Global Investors Fund - Allianz Volatility Strategy Fund Share Class A (EUR)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU0417273140
WKN: AORGFE

Objectives and Investment Policy

Long-term capital growth by exploiting return opportunities in the volatility space based on the volatility risk premium through investments in a broad range of asset classes. In addition, the Sub-Fund will use volatility related derivatives including, but not limited to, variance swaps, options and volatility swaps related to different asset classes.

We follow an active management approach with the aim to outperform the Benchmark. In selecting and weighting the fund's assets we do not replicate or reproduce the Benchmark. Sub-Fund assets therefore deviate significantly from the Benchmark.

Sub-Fund assets are invested by us in bonds with a minimum rating of B- of OECD, EEA and/or EU member states and/or in global equity markets. Sub-Fund's core strategy uses volatility related derivatives e.g. variance swaps on global equity markets (e.g. US and Europe equity markets as underlying). These swaps may differ in terms of swap period, underlying security and strike variance. A variance swap results in a financial settlement between the parties at the end of the swap period. The value of a variance swap does not depend 1:1 on the absolute performance of the underlying to which it refers; instead, it depends in particular on the change in the annualised realised variance of the respective underlying in the respective swap

period. For this reason the value of a variance swap may even rise when the value of its underlying is dropping, or it may fall when the value of its underlying security is rising. Depending on how the variance swap is structured, the Sub-Fund's potential loss resulting from the variance swap may also be automatically limited by the portfolio management. Duration of Sub-Fund assets should be between 0 and 24 months.

Benchmark: €STR (in EUR).

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommended Holding Period: 5 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

SFDR Category – Article 6 (a financial product that does not consider the EU criteria for environmentally sustainable economic activities)

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to medium price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	6.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	1.30%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. It does not include transaction costs incurred when we buy or sell assets for the fund.

You will find more details about the calculation of the charges by checking the respective part of the prospectus.

Past Performance

We do not yet have performance data for one complete year. Therefore we can not provide a useful indication of past performance to you.
