BlueBay Euro Bond Aggregate, a subfund of the SICAV AMSelect

Class "Privilege Distribution" - ISIN code LU2412113982

This Fund is managed by BNP PARIBAS ASSET MANAGEMENT Luxembourg, part of the BNP Paribas Group.

Objectives and investment policy

The Fund is actively managed. The benchmark Bloomberg Euro Aggregate Bond is used for performance comparison only. The Fund is not benchmark constrained and its performance may deviate significantly from that of the benchmark

The Fund seeks to increase the value of its assets over the medium term by investing mainly in investment grade corporate and government bonds denominated in EUR and issued either by a member states of the European Union or by companies that are domiciled or do most of their business in Europe. The Fund may also invest a minor part of its assets in other bonds, equities and money market instruments. The Fund can use derivatives for hedging, efficient portfolio management and to seek investment gains. Investment grade securitised products may represent up to 20% of the assets and up to 10% can be invested in coco bonds. The fund maintains at least 95% exposure to EUR, using hedging to achieve this if necessary. The Fund uses macroeconomic, market and proprietary credit analysis to select securities that appear to offer a favourable risk-adjusted return (top-down approach).

Environmental, social and governance (ESG) criteria contribute to, but are not a determining factor in, the manager's decision making.

A dividend may be distributed.

Investors are able to redeem on a daily basis (on Luxembourg bank business days) as described in the prospectus.

Risk and reward profile

1	2	3	4	5	6	7

- Historical data may not be reliable indication for the future.
 - The risk category of a Fund is an indicator but not a target or a guarantee and may shift over time.
 - The lowest category does not mean a risk-free investment.
 - Why is the Fund in this specific category?
- The risk category is justified by the investment mainly in Interest Rate instruments. The investor's attention is drawn to the fact that an increase in interest rates results in a decrease in the value of investments in bonds and debt instruments and more generally fixed income instruments.
- The higher the risk, the longer the recommended investment horizon.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Credit Risk:** This risk relates to the ability of an issuer to honour its commitments: downgrades of an issue or issuer rating may lead to a drop in the value of associated bonds.
- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Operational and Custody Risk:** Some markets are less regulated than most of the international markets; hence, the services related to custody and liquidation for the subfund on such markets could be more risky.
- **Derivatives Risk:** When investing in over the counter or listed derivatives, the Fund aims to hedge and/or to leverage the yield of its position. The attention of the investor is drawn to the fact that leverage increases the volatility of the subfund.
